## PROGRESS AND PROBLEMS OF SCIENCE DISCUSSED AT BIG MEETING IN TORONTO

Number of Papers Read by Leaders at To-day's Sessions of Sections of British Association for Advancement of Science; Development of Railroad Transportation in Canada Described in Paper Prepared by Sir Henry Thornton.

Toronto, Aug. 7.—Business of the various sections of the British Association for the Advancement of Science at the annual meeting here began this morning with the reading of twenty-six papers which dealt with widely diversified subjects.

One of the most interesting papers was the report of the committee on educational training in the secondary schools of Great Britain for life in the Dominions. The work of the schools is one in which the Prince of Wales is deeply interested and he particularly referred to it in the cable which he sent to the opening meeting at Convocation Hall last night.

Dr. A. C. Haddon presented a suggested arrangement of the races of man which had possibilities while Professor G. M. Wing, in a treatise on education, suggested an uniform standard could be set for the teaching of history and geography of the British Empire in the schools of the various Dominions.

The segregation of racial characters in a population held the attention of J. Wiseler's audience.

## RAILWAY HEADS' VIEWS

Sir Henry Thornton, president of the Canadian National Railways, in his speech gave an account of his knowledge of Canada from the rail-wayman's viewpoint and expressed his confidence that the system which he directed would become one of the finest publicly-owned utilities in the world.

The audience listened to the address of Professor J. W. Gregson on inter-racial problems and white colonization in the tropics in the geography section, and the address of Dr. F. C. Shrubshall on health and physique through the centuries in the anthropological section.

## THEORIES OF LAUGHTER

In the physiology section Dr. J. Dreyer discussed many novel theories of laughter which tickled the sensibilities of an audience and in the physiology section Professor A. T. Cameron, Dr. Tingwaldsen and J. Carmichael wrestled in turn with the activities of iodothyroglobulin and to digest fractions compared with myrobin.

The women of the association were the guests of the Toronto Women's Canadian Club at a luncheon, and in the afternoon a party of geologists examined palaeozoic rocks near Toronto.

## SPEECH AND VOICE

During the afternoon mathematicians listened to Sir Richard Paget on the nature of speech and voice production, and the anthropologists heard Professor H. J. Rose tell of the Bride of Hades.

The engineering section of the association took a trip round the harbor in guests of the Toronto Harbor Commission, and at four o'clock there was a reception to the principal officers of the organization at the City Hall by Mayor Hiltz, the Councillors and members of the City Council.

## WHITE INDIANS

Some of the British scientists having seen some of the "white Indians" from Central America and having pronounced them albinos, it is unlikely the association as a whole will make further investigation of the matter. This is the opinion expressed by representative scientists.

## CANADA'S RAILWAYS

Sir Henry Thornton is at present on tour in British Columbia, so this paper is written on behalf of the engineering section to-day. It gave a very complete sketch of the development of railway transportation in Canada.

Sir Henry first dealt with the part railway transportation plays in modern social and economic life, and the great difficulties in communication between different parts of the country.

## SPANISH CONSUL IN MONTREAL IN COURT

He and Another Charged  
With Having Smuggled  
Alcohol Into Canada

Montreal, Aug. 7.—Testifying in his own behalf yesterday, Miguel de Malquier, Spanish consul, who with Ramon de Torreto, a Spanish importer, is charged with smuggling alcohol into Canada and with conspiracy to smuggle drugs, swore that he had never discussed smuggling with Brown and Dufrane, members of the Royal Canadian Mounted Police.

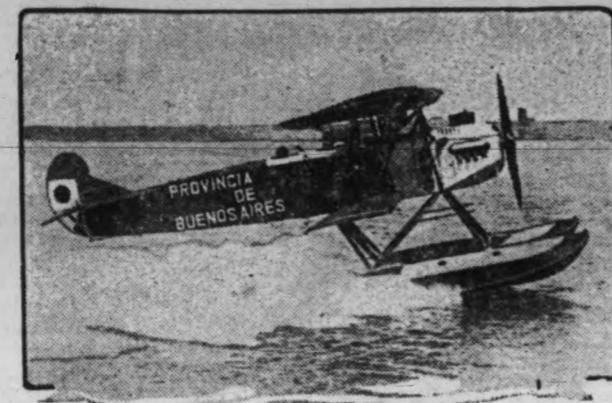

In explanation of his alleged smuggling with Rubino, alias Sergeant Brown, the accused said he was most anxious to increase the trade relations between Canada and Spain and when he was told the detectives, who owned several millions between them, were about to interest themselves in the importing business, he thought it was his business to encourage them as much as possible.

## ALCOHOL FROM SPAIN

Accused said there had been a lot of talk of exporting alcohol to the United States via Canada from Spain. He declared it was no longer possible to import from companies who should be formed and accused mentioned among those willing to connect up with the scheme the name of Achille Bergenvin, ex-M.P.P.

The hearing is being continued

## AEROPLANE PILOTED BY ARGENTINE AIRMAN ON ROUND-THE-WORLD FLIGHT IS NOW IN INDIA

The aeroplane in which Major Zanni and his companion are attempting to encircle the earth is pictured above. The start was made from Amsterdam. The latest report said the fliers had left Allahabad for Calcutta.

## PROF. H. LAMB OF CAMBRIDGE, IS GIVEN Honor by SCIENTISTS

Toronto, Aug. 7.—Professor Horace Lamb of Trinity College, Cambridge, who yesterday was elected president of the British Association for the Advancement of Science for the year 1925, is one of the most outstanding figures in the intellectual life of Great Britain. He has written extensively and has published a standard volume dealing with hydro-dynamics, infinitesimal calculus, statics, dynamics and mathematical physics. In his particular field he is recognized, according to the visitors to Toronto, as one of the greatest intellects of the present century. He is seventy-five years of age.

## PREPARE TO GREET SCIENTISTS HERE

Part of Organization Will be Welcomed in Victoria

While the British Association for the Advancement of Science has opened its Toronto meeting, bringing distinguished scientists from various parts of the British Empire to the Ontario capital, the local committee which has in charge the reception here for the distinguished guests is steadily working out details.

Four hundred will comprise the party which will arrive in Vancouver about August 23, and about two-thirds of the party will converge to Victoria on Monday, August 25. They will be received by Lieutenant-Governor Nichol and Government officials, and will be shown over the Parliament Buildings, the Museum and provincial archives.

## CIVIC BANQUET

Leading Liberals believe that it is quite possible that the Premier may be returned by acclamation in Nelson, as the people of that city showed in the recent election that they are behind the government and are particularly interested in Mr. Oliver's freight rate campaign.

Whether the Conservative Party will oppose the Premier in Nelson, it is expected, will depend largely upon

## CONFEREES AGREE ON DEFAULT STATEMENT

Allied and German Delegates in London Approve New Reparations Plan

Efforts to Find Compromise Scheme For Evacuation of Ruhr

London, Aug. 7.—The Allies and the Germans have reached a complete agreement on the manner in which defaults are to be declared under the Dawes plan.

The conference leaders on the Allied side met first this morning and shortly afterward, the Germans were admitted to take part in the discussion.

It was decided to refer the question of amnesty for German nationals in the occupied territories to the conference jurists. An agreement on this subject is considered probable.

French circles expressed themselves quite satisfied with the morning meeting. They said the two propositions in a moderate way and the tone of the discussion was most courteous.

CAPABLE OF ADJUSTMENT

One of the French spokesmen asserted that many of the points put forward by the Germans were capable of adjustment and reconciliation with the agreements reached by the Allies. It was said that in some instances, on the basis of the explanation seemed necessary to make the German and Allied views coincide.

The conference experts in Downing Street resumed their consideration of the question of the restoration of Germany's economic unity and the problem presented by the transfer of reparations receipts.

REPORT ADOPTED

The Council of fourteen to-day adopted the report of the first committee of the International Committee.

In addition to these lines, five others will be constructed in Alberta and British Columbia.

The hearing is being continued

## WORK STARTED ON C.N.R. BRANCH LINE IN SASKATCHEWAN

Winnipeg, Aug. 7.—Work has been started on the Canadian National Gravelbourg extension, according to announcement made by officials of the company. On completion of this section, operations will be extended to other authorized branch lines of the Canadian with the same name.

ACCUSED ALCOHOL FROM SPAIN

Accused said there had been a lot of talk of exporting alcohol to the United States via Canada from Spain. He declared it was no longer possible to import from companies who should be formed and accused mentioned among those willing to connect up with the scheme the name of Achille Bergenvin, ex-M.P.P.

The hearing is being continued

(Continued on page 2.)

## Bets at Willows Total \$429,723

Bets wagered at the Willows during the race meet which ended yesterday totalled \$429,723. The pari-mutuel tax on racing bets made here and in Vancouver during the first half of the racing season amounted to approximately \$150,000. It is believed that a similar amount will be collected in the last half of the season, which starts at Colwood to-day.

## REGRET EXPRESSED HUGHES DID NOT PAY ROME VISIT

Rome, Aug. 7.—Il Mondo, commenting on the departure of Charles E. Hughes, Secretary of State of the United States, for home after his European trip, complains that while he visited London, Paris, Brussels and Berlin, he skipped Rome.

The paper says that perhaps the Italian ambassador in Washington will be able to explain why Mr. Hughes skipped Rome.

## PROMISES SLAYER WILL BE PUNISHED; PRESIDENT OBREGON

The Mexican Government has stated its intention of running to earth, the men who murdered Mrs. Rosalie Evans, a British subject, near her ranch in the State of Puebla. President Obregon has expressed his own keen regret.

## BRITISH NOTE SENT TO MEXICO CITY

U.S. Conveys Representations on Murder of Mrs. Rosalie Evans

Washington, Aug. 7.—A communication from the British Government to the Mexican authorities by United States Charge Schoenfeld.

The impression prevails that the British communication was of the usual character in such circumstances and contained representations as to the steps the London Government deems it necessary the Mexican authorities should take to apprehend and punish those responsible for the murder of a British subject.

In view of Premier MacDonald's statement in London, it is regarded as improbable that this communication is more than a preliminary to further representations which undoubtedly will be made dealing with the questions of redress and safe-guarding of British lives and British-owned property in Mexico hereafter.

## FAKE," SAYS LLOYD GEORGE

London, Aug. 7.—"This is a fake—a contract in which every essential figure is left blank," exclaimed former Premier Lloyd George in the course of sharp criticism of the proposed agreement with Soviet Russia. His phrase is endorsed by the majority of the morning newspapers, which fully share in the amazement with which the Conservatives and most of the Liberals received the news.

Arthur Ponsonby, Under-Secretary for Foreign Affairs, that a commercial treaty and a general treaty had been arranged with the Soviets.

The House of Commons was opened by Sir Robert Horne with an attack on the Premier's procedure and a characterization of the treaties as an illusion.

In the House of Lords Marquis Curzon made an address along similar lines.

"FAKE," SAYS LLOYD GEORGE

London, Aug. 7.—"This is a fake—a contract in which every essential figure is left blank," exclaimed former Premier Lloyd George in the course of sharp criticism of the proposed agreement with Soviet Russia. His phrase is endorsed by the majority of the morning newspapers, which fully share in the amazement with which the Conservatives and most of the Liberals received the news.

Arthur Ponsonby, Under-Secretary for Foreign Affairs, that a commercial treaty and a general treaty had been arranged with the Soviets.

DAILY HERALD APPROVES

There is some favorable comment. The Daily Herald, Labor, naturally welcomes the happy result with the greatest satisfaction. The Daily

**BRITISH PARLIAMENT AD-JOURNS AND PREMIER TO SIGN SOVIET TREATIES**

(Continued from page 1)

News, Liberal, thinks that "to have arrived at an agreement with the Soviet delegation is a considerable achievement, for which jaise is laudable," but it withdraws definite opinion of the merits and possibilities of the treaties pending fuller explanation of their terms.

The Westminster Gazette, Liberal, without condemning the agreement, says the terms will need to be carefully scrutinized.

**CORNFLAKES AND ANGRY**

The other newspapers are either scornful or angry, or both. The Times doubts that Parliament will ever agree to the proposals.

"The arrangement," it says, "practically leaves the main issues untouched."

**INDIGNATION EXPRESSED**

The Daily Mail expresses indignation, and recalls that Mr. Ponsonby had said that it was out of the question for the Government to guarantee a loan.

The Daily Chronicle, a supporter of Lloyd George, can not recall "any Government ever treating Parliament worse in a great issue of foreign affairs."

The astonishing and sudden change from an announced breakdown of negotiations to the reaching of an agreement is attributed to the special efforts of Premier MacDonald and the trade unions.

**SPENCER PICNIC AT GANGES HARBOR GREAT SUCCESS**

Five Hundred Members of Victoria Staff Enjoy Annual Picnic

Trip on Princess Adelaide Through Islands Thoroughly Enjoyed

Yesterday will live long in the minds of 500 members of the staff of David Spencer (Victoria). Limited as the occasion of one of the most enjoyable outings in many years. The rendezvous was Ganges Harbor, the beautified vacation spot on Salt Spring Island.

Under ideal weather conditions, the picnic proceeded from its opening event to the closing number without hitch, and with added delights that from a wise choice of playground. At the Island the large party found diversity of interest that appealed to every taste. Boating, swimming, rambles in the shady woods, fine sports and dancing, added to the hospitality of Island residents, left no room for disappointment.

Nothing occurred to mar the completeness of a perfect day. It was a contentedly happy departmental family that returned to Victoria shortly before 10 o'clock last night.

One of the most delightful portions of the outing was the sailing of the Princess Adelaide, chartered for the occasion.

Steaming out of the harbor at 9 a.m. the Adelaide sailed through the beauties of the Gulf Islands in perfect weather.

A light breeze served to enhance the voyage and made the heat of a cloudless day enjoyable from every angle. The passengers, who in part, made full use of Ender's orchestra, dancing on both the outbound and return trips of the boat, and at the pavilion on the Fair Grounds at Ganges Harbor. To others it was delight to watch wooded islands enhanced by a summer-mirage as the boat wound her way in and out of the channels.

The party landed at Ganges at noon, and proceeded to the Fair Grounds for lunch.

Basket lunches shared in community, with hot tea and coffee provided by caterers, proved a welcome addition to the programme. In the afternoon an excellent card of field events was staged, prizes being given in the form of scrips exchanged for merchandise.

The children were given twenty-five cents each in ticket coupons, which translated itself in countless ice-creams and delectable candy.

The enjoyment of the children was summed up by one little fellow when the Adelaide docked on the return trip to Victoria. "Had a great day," asked his father of the little fellow, who replied, "I'm up in a limp roll over his shoulder." "Some day," murmured the child, and was instantly asleep.

The sports programme was wisely varied so that fixtures were provided for everybody. Tug-of-war team headed by Mr. J. W. Spencer, closed the programme by vanquishing that headed by Mr. D. S. Spencer in the final. One of the most exciting races of the day was the egg and spoon race.

Re-embarking at 6:30, the party enjoyed the return trip to Victoria in the cool of the evening. Dancing and singing were kept up until the dock was reached where hearty cheers testified to the complete success of the day. Much credit for the smooth working of affairs goes to the chairman of the executive committee composed of Messrs. Locke, Westcott, Akina, Laver, Whitman, Hawkes, Harper, Wilkinson and W. B. Grant.

**SPORTS RESULTS**  
Following are the complete results of the sports programme:

Tiny Tots, 50 yards—1. Ruby Foyer; 2. Eileen Dunn; 3. Kenneth Campbell.

Girls' 5 to 8 years, 50 yards handicap—1. Eileen Sparks; 2. Mary Smith; 3. May Sparkes.

Girls 8 to 12 years, 50 yards handicap—1. Eileen Bruce; 2. Gladys Allen; 3. Eileen Thomas.

Girls 12 to 16 years, 75 yards handicap—1. Barbara Grant; 2. Lilian Mackenzie; 3. Eileen Baynes.

Boys 5 to 8 years, 50 yards handicap—1. Eddie Campbell; 2. Billie Herbert; 3. Eddie Dunn.

Boys 8 to 12 years, 50 yards handicap—1. Jas. Cradock; 2. Chas. Preston; 3. Jas. Laver.

Boys 12 to 16 years, 75 yards handicap—1. Sam Mackenzie; 2. R. Hibbard; 3. Jack Laver.

Married ladies, 50 yards handicap—1. Mrs. E. Hippwell; 2. Mrs. Bruce; 3. Mrs. Plain.

Married men, 100 yards handicap—1. Mr. L. Maynard; 2. T. Ross; 3. R. Miller.

Single ladies, 75 yards handicap—1. Dorothy Thomas; 2. Miss M. V. Cox; 3. Beth Campbell.

Single men, 100 yards handicap—1. Mr. Wylie Grant; 2. F. Freer; 3. G. Fraser.

Ladies' potato race—1. Lily MacKenzie and Barbara Grant (draw); 2. Miss Dunn; 3. Beth Campbell and Ad. Smith (draw).

Men's potato race—1. F. Freer; 2. Cecil Thomlinson; 3. Lionel Locke.

Ladies' race (open), 75 yards handicap—1. Miss M. V. Cox; 2. Miss Chappell; 3. Miss MacKenzie.

Men's race (open), 100 yards handicap—1. G. Fraser; 2. W. Grant; 3. F. Freer.

Wheelbarrow race, 40 yards (man for baby, with lady wheeler)—1. Jack Foyer and Mrs. Foyer; 2. Mr. Griffin and Miss Clarke; 3. Mr. L. Freeman and Miss Yule.

Thread the needle, 50 yards (lady and gentleman)—1. Mr. Griffin and Miss Clarke; 2. Gyril Griffiths and Miss Chisholm; 3. Mr. Milburn and Miss M. Cox.

Men's three-legged race, 75 yards—1. Fred and Milburn; 2. L. Osborne and Williams; 3. J. L. Jenison and W. Grant.

Committee egg and spoon race, 50 yards—1. Fred Smith; 2. B. E. Wilkinson; 3. E. Westcott.

Tug-of-war (With Spencer's team)—David Spencer's team—Winnipeg team, H. Williams; G. Scott; W. Shirley; J. Tomlinson; J. Gray; W. Grant; J. W. Spencer (captain).

**COMMITTEEMEN IN FIFTY-YARD DASH AT GANGES HARBOR**

—Photograph by Goodenough.  
The committee in charge of the annual picnic of Messrs. David Spencer Ltd. yesterday at Ganges Harbor are shown here. Reading from left to right: B. E. Wilkinson, Fred Smith, W. B. Grant, Walter J. Laver, Lionel Locke, John Atkins, Fred G. Harper, Dave Spencer, Percival A. Hawkes, and E. E. Westcott. The group was taken just at the start of the egg and spoon race. The race that followed was one of the most exciting events of the day.

**NORTHBOUND BOATS ARE ALWAYS FILLED**

Capt. J. W. Troup, of C.P.R., Declares Prospects Brighter

Has Hopes of Great Future For West Coast of Island

"Business prospects generally are better this year than they have been for some time, both along the west coast of the Island and into the northern ports, where Canadian Pacific vessels touch," said Captain J. W. Troup, Manager of the British Columbia Coast Steamship Service, to The Times this morning. "We have had hopes for the development of the west coast of Vancouver Island for many years, and things are now going ahead there."

Captain Troup said that he had realized the vast possibilities of the Pacific side of this Island for many years.

The world was steadily approaching that place in its history when it would call for Vancouver Island's natural wealth, Captain Troup believed, and the time was not far distant when the greater part of the resources of the Island would be called into use and brought unavoidably into the markets of the world. Captain Troup firmly believed that the demand for timber would be met according to the peremptory demands made upon them; the biggest demand, then the greater would be the people of the west coast prosper.

"Already there is a sign of increasing prosperity in the pulp manufacturing business on the Island," said Captain Troup. "There is no reason why these things should not be exploited for all that they are worth." He pointed out that there was a waterway leading from the interior of the Island to the sea coast of the Island, and in the opinion of some actually surpassing it in convenience. His suggestion was that a new canal be dug for navigation purposes, and that there was talk of extending the plants of some of the major concerns operating in such places as Port Alberni, Port Renfrew and other points.

Speaking of the tourist travel, Captain Troup admitted that the ocean trip was one of the most beautiful in Canada, and that it rivalled the grandeur of the cruise into Alaskan waters from this port along the east coast of the Island, and in the opinions of some actually surpassing it in convenience. His suggestion was that a new canal be dug for navigation purposes, and that there was talk of extending the plants of some of the major concerns operating in such places as Port Alberni, Port Renfrew and other points.

He also suggested that a new canal be dug for navigation purposes, and that there was talk of extending the plants of some of the major concerns operating in such places as Port Alberni, Port Renfrew and other points.

## SEATTLE INVITES MAJ. STUART MacLAREN

Seattle, Aug. 7.—An invitation to attend a celebration to be held in Seattle about the last of this month for the United States government on the completion of their 27,000-mile circuit of the earth was extended to Major A. Stuart MacLaren, commander of the British around-

the-world expedition, by the Seattle Chamber of Commerce last night. Major MacLaren and his companions, who abandoned the world flight when the engine of their plane failed and the machine was damaged beyond repair last Saturday off Bering Island in the Komandorski group, are en route to Vancouver via Dutch Harbor, Unalaska Island, aboard the Canadian fisheries patrol trawler Thiepval. The Seattle invitation requested

Major MacLaren and his companions to be honor guests of the city during the celebration for the American flyers.

**See the big American Fleet at Port Angeles.** August 10. Special low round trip fare only \$1.00. Steamer "Olympic" sailing 9 a.m. and 3:30 p.m. Tickets at Puget Sound Navigation Co., 912 Government Street and C.P.R. Wharf Ticket Office. \*\*\*

New York, Aug. 7.—"One-twenty-four" was the mysterious count that aroused Mrs. Maurice Dunn from her slumbers.

She heard it again. Frantically she awakened her husband. They listened together.

**Burglars?** Cautionily they advanced to the living room, whence the sound came.

They expected to find a burglar at work. Instead they found the radio had been in action all night and that a "daily dozen" expert was broadcasting a lesson.

Bishop Dowling was the Dean of the Canadian Roman Catholic Episcopate and with one exception the oldest bishop in all America. In spite of his years and several very serious illnesses, he continued to make his official visits up to two or three years ago in quick time throughout his extensive diocese without the least sign of fatigue or weakness.

### U.S. CANADIAN TRADE

Washington, Aug. 7.—Exports from the United States to Canada during the last fiscal year, valued at \$618,155,000, showed a decline of nine per cent, from the previous year, according to the Department of Commerce shows. The United States during the same period purchased \$417,000,000 worth of goods from Canada, a one per cent, increase over last year.

## REV. T. J. DOWLING DIED IN HAMILTON

People Yesterday Saw Nova Scotia Scenes of 175 Years Ago Re-enacted

Halifax, Aug. 7.—An historic scene was re-enacted here yesterday in connection with the anniversary carnival, when the founding of Halifax by Hon. Edward Cornwallis, 175 years ago, was carried out in pageantry on the campus of Dalhousie University, near what is believed to be the exact spot upon which Cornwallis planted the British flag in 1749.

Shortly after noon a tall sided, stumpy little craft, gaudily painted, swung up the quiet waters of the Northwest Arm and sent a boat ashore loaded with red-coated officers and sailors. The officers' craft was a replica of Cornwallis' ship and the landing party included men impersonating Cornwallis and his staff. On the shore they were met by two friendly Indians, who guided them to a grassy glade a short distance inland, whereas the historic landing 175 years ago was made by only half a dozen French and Indians, the route of march yesterday was lined by thousands of people and the "grass glade" was walled in, not by the forest of Cornwallis' time, but a throng of cheering people estimated at nearly 10,000.

**ACADIANS' VOW** Thomas Joseph Dowling was born February 28, 1849, in the County of Limerick, Ireland. At the age of eleven years he moved to Hamilton, Ontario, with his father. There he received his elementary education in a select school.

In 1855 he entered St. Michael's College, Toronto, where he distinguished himself by his conduct and promise, during the seven years he was there. In 1862 he went to the Grand Seminary of Montreal, where he made his theological studies, after which he was ordained priest in St. Mary's Cathedral, Hamilton.

On October 5 of the same year he was appointed pastor of Paris and Galt, Ontario, with the missions of North Smithfield, the villages of Ayr, Glenmoris and Harrisburg, and for a time, the villages of Hespeler and Preston. He completed and beautified the Paris church at an outlay of about \$20,000, and collected a large amount of this money by lecturing and preaching abroad, the parish being neither large nor wealthy at the time.

He also organized the first council, and the most striking feature of the organization of the pageant was the fact that the table used 175 years ago and kept as a treasure in the Provincial Buildings here.

**FAIR WEATHER** The ceremony of administering the oath of allegiance to Governor Maserolle and his followers who had come from the settlement at Annapolis for that purpose was duly carried out, and then the stern visaged Acadians from Grand Pre came forward and declared their determination to remain loyal to France and not to Britain. They were allowed to withdraw while the Indians came forward and silently presented the pipe of peace. After all had solemnly puffed the symbolic pipe, the party gathered around the council table in commemoration of Cornwallis' first council, and the most striking feature of the organization of the pageant was the fact that the table used 175 years ago and kept as a treasure in the Provincial Buildings here.

**Fair Weather** The weather favored the pageant and it was most successful in every detail. Last evening there was an illuminated ship parade on the Northwest Arm and an illumination of both the harbor and around the former being carried out by the British battleship Hood and Repulse and the Australian light cruiser Adelaide.

**'Burglar' Arouses House, But it Was Only Radio Trick**

tying or restricting the powers of the boundary commission.

Mr. J. H. Thomas, after outlining the events which led to his visit to Dublin, said the British Government, in order to leave no doubt in the minds of the Irish people and of the world of its determination to carry the treaty into effect, had decided to ask Parliament to meet September 30 instead of October 21. On that day the Government would move some measure of the Irish bill unless by that time the latter Government had nominated its members of the boundary commission.

**Trade Balance is Against Australia**

Melbourne, Australia, Aug. 7 (Canadian Press Cable, via Reuters).—The imports of the Commonwealth of Australia for July, 1924, amounted to £146,000,000, while the exports were valued at £119,000,000. The imports increased by nearly £9,000,000 as compared with the previous year. The exports increased by more than £1,500,000. The exports of wheat and flour increased by more than £4,000,000. The exports of greasy wool increased by nearly £2,000,000, while the exports of scoured wool decreased by £3,500,000.

No matter how served

HOW good—how luring are these toasted kernels of Rice and in what a variety of ways can they be served. Puffed Rice makes every bowl of milk inviting—makes every dish of fruit more luscious.

For children douse the grains with melted butter as you would popcorn. Use as a garnish for desserts, and instead of nuts in home candy making.

Let the children have all they like—at meals and between meals.

The utmost in a delicious food—digestible, appetizing.

Quaker Puffed Rice and Quaker Puffed Wheat are whole grains—steams exploded to eight times normal size. They are energy foods. They are wise foods, for they contain the whole grain. Serve in plenty every day.

Keep both on hand.

## SHOULD RECONSIDER

We hope the Provincial Government will reconsider its decision to contribute nothing more substantial than a hand-shake to the arrangements for the entertainment of the British Association for the Advancement of Science on its visit to British Columbia this month. The Governments of Ontario, Saskatchewan and Alberta, with a proper appreciation of the importance of the Association, the greatest aggregation of scientific leaders in the world, and the advantages which can be derived by their provinces from its tour, have taken an active interest in the activities of the party and have given tangible assistance to the preparations for its visit. The amount sought from the British Columbia Government is fifteen hundred dollars, about half the provision which has been made by the Government of Saskatchewan. This is a very modest sum considering the purpose for which it is desired, and contrasted with other outlays, which we could easily mention, not half so useful. It is not often the Government has an opportunity of helping to impress so many world-famous people with the attractions of one of Canada's greatest provinces at so little expense. The people of British Columbia, it is true, desire proper economy in the administration of their affairs, but they do not want any penny-wise-pound-foolish application of it. Certainly they are not petty enough to balk at the expenditure of so small a sum for so useful a purpose.

## SHUTTING OFF BUSINESS

TWO Californian motorists got out of their car on Douglas Street yesterday afternoon and asked if the town was always as quiet as it appeared to be to them at that time—between three and four. The Victorian who satisfied their curiosity explained the half holiday, the races at the Willows, and the Garden Party at Government House. He suggested to the visitors that these were three direct causes of virtually empty streets and a more or less general stoppage of business.

"Well," said one of the prosperous-looking Californians, "I should have thought that at this time of the year the stores would have been open all the day time to ease us of some of our holiday money; we got in this morning and thought of doing a bit of shopping. Anyway, I guess we'll be here a couple of days or so." This conversation is very probably typical of dozens of others of a similar nature. It is one more illustration of how to lose business.

Surely the time has come when Victoria should do something on its own account to increase its business and extend its payrolls. It can not expect to prosper as it has a right to prosper if it subscribes to a condition which advertises the town as quite satisfied with five and a half days' business each week. Victoria's trouble is too many channels of expenditure and nothing like enough avenues of revenue.

## HIGH PROTECTIONIST FICTION

HIGH protectionist newspapers in this country seem to be displaying an extraordinary eagerness to prove to their readers that the repeal of the McKenna duties is already having a very adverse effect upon economic conditions in Great Britain.

"So serious has been the effect already on the trade with the Dominions"—says a special dispatch from London to The Montreal Star—"that one of the biggest Sheffield steel firms has completed negotiations with a company in Vancouver to establish a plant there, and it is more than likely that many other English firms will follow this example."

British Columbia will welcome as many British firms as may care to establish branch factories in this part of the world. Reasons for such a course will be immaterial to the people of the Province as long as industrial progress shall be advanced thereby. But there was another dispatch sent from London on the same day as that on which The Star received its message from its own news source in Great Britain. The other cable mentioned the same firm as that referred to by our Montreal contemporary.

We refer to the Canadian Press dispatch in which the Managing Director of this company is quoted as saying that the reason a decision had been reached to establish in British Columbia was solely a result of high taxes and the unreasoning attitude of Trades Unions towards improved machinery methods. In fact he said "if the proposition fails to improve here—meaning Sheffield—we shall have another base from which to operate."

It will be seen that no reference was made by this important official of the company to McKenna duties. Why? The McKenna duties were imposed on motor cars, motor

cycles, musical instruments, watches, and films. Only in a very indirect way would they involve a great steel industry. And it should not be forgotten that the duties were not actually repealed until the first of this month.

If The Montreal Star and its high protectionist friends want to make political capital out of the McKenna duties they ought at least to remember what articles were taxed. It is too much to expect them to recall that when Mr. Austen Chamberlain renewed these imposts in 1919 he was insistent that henceforward the renewal date should be May 1 instead of August 1 in order that their strictly provisional nature should be the more easily recognized from permanent duties—renewable on August 1 each year. The date was altered accordingly. Mr. Snowden extended it to August 1 in this year of repeal "to give manufacturers a breathing space."

When British Trades Union employment figures are issued twelve months from now it will be discovered that the repeal of the McKenna duties will have had just about as much effect upon the industrial condition of Britain as even many Tories expect it to have—precious little.

## AFTER THE CONFERENCE

POLITICAL writers in the United States are speculating upon the possibility of President Coolidge calling a new disarmament conference before the presidential election. They contend that such a move on the part of the chief executive would appeal very strongly to that growing element in the country which would sacrifice a good deal to help the cause of permanent peace.

If the present International Conference had not taken place, and if the reparations question were not as near a settlement as it appears to be at the moment, it is fairly safe to say that President Coolidge would hesitate before taking any action which his opponents might charge to political motive. But if the business which is now being transacted in London shall be as successful as it promises to be, there is very good reason why the world might look to the United States to call another gathering and give the nations an opportunity to take full and practical advantage of the settlement which is now expected.

Our neighbors are interested in the Dawes plan and Ambassador Kellogg and other American representatives in London have contributed in no mean fashion to the success of the Conference to date. On that account alone the completion of the inevitable treaties might well be followed by another effort, on American soil, to encourage a higher quality of international trust.

Actual discussion of armament reduction and the carrying out of demolition programmes may not prevent war, may not even put an end to competitive building of the more modern engines of destruction, but every international interchange of view on this subject serves to emphasize the utter futility of human conflict and helps to disarm men's minds. As that process succeeds so will lasting peace be nearer.

Mr. Bowser will get lots of fun by separating the "wheat" from the "tares" as the delegates to the Conservative gathering come up to him to offer their regrets next Saturday.

Does the Victorian who is for ever saying "the town's dead" stop to think that his own effort to make it more lively is often equalled, by the energy of a dead mouse.

British Columbia's goods should be in the window in every sense of the term when the British scientists come to this Province towards the end of the present month. It will be a splendid opportunity to give first hand information to men of great influence.

A contemporary remarks that "democracy never yet won an empire and its capability of keeping one has yet to be tested." Our impression is that the recent unexpected war was a pretty good test of the capacity of a democracy for keeping an empire. The only great empire heavily subjected to that test which was not destroyed was the one based upon democratic institutions, while the Russian, German and Austro-Hungarian Empires which had been based upon autocracy were destroyed.

If the British Empire were similarly based it would have fallen to pieces years ago. A little touch of German autocracy in London lost for our Empire half of this continent, and the other half was retained only because it was given self government—a democratic measure. About the most impossible thing in this world, according to the teaching of history, is the maintenance of autocratic rule beyond a very limited period over any enlightened liberty-loving people—and most particularly the British people.

## OR PERHAPS A LUMP

From The Regina Leader  
After the Senate has blocked the construction of western branch lines for two consecutive years, Senator Willoughby's statement that these lines will receive careful and sympathetic consideration next year must be taken with a grain of salt.

## INSULAR OF NECESSITY

From The Toronto Mail and Empire

Britain continues to act upon her own view of trade policy, and it is not to be wondered at if Australia and other dominions take the hint and put their own economic interest first. Such an insular policy all round may be the short-cut to the adoption of an empire trade policy that will conserve empire markets for empire countries.

## NOT GARDEN HOSE

A flapper, with rolled-silken hose, went walking 'mid the garden rows.

Potatoes filled their eyes with dirt. The corn was shocked and greatly hurt. Carrots stood rooted to the ground. While apples up a tree were found.

Cabbages covered up their heads. The lettuce covered in their beds. While all the peaches who had seen Turned, with envy, a vivid green.

VICTORIA DAILY TIMES, THURSDAY, AUGUST 7, 1924

## Dr. Frank Crane on "Doumergue"

(Copyright)

ON the thirteenth of June, M. Gaston Doumergue was elected President of the French Republic by the National Assembly at Versailles. This National Assembly consisted of the Senate and Chamber of Deputies combined.

M. Doumergue received five hundred and fifteen votes as against three hundred and nine by his nearest competitor.

M. Doumergue is considered a radical Social but a mild one. So mild indeed that the bulk of the Socialists and Radicals were opposed to him and he was elected by the more moderate votes of the Assembly, by those who considered it necessary for the traditional policies of France to be maintained. It should not be forgotten that M. Doumergue voted for and defended M. Poincaré's foreign policy in the Senate and approved of France's entry into the Ruhr.

There were only three candidates, M. Doumergue, M. Painlevé and third, M. Camelinat. The result of the voting was that M. Doumergue received 515 votes, M. Painlevé 309, and M. Camelinat 21. Having polled more than half the votes cast, M. Doumergue was therefore declared elected.

M. François-Marsal announced to M. Doumergue, in a private reception room called the Salle Marengo, that he had been elected President, and M. Marsal, who during the interregnum had been constitutionally charged with all executive powers, handed them over to the new President.

After thanking Mr. Martin and M. Marsal for their congratulations, M. Doumergue said that he would endeavor to put into practice at the Elysée the same principles of fidelity to ideals and love of country which had been his during a political life extending over thirty years.

After shaking hands with the Senators and Deputies and the members of the French and foreign press, and thanking them all for their congratulations, M. Doumergue drove off through the troop-lined streets in an open car bearing the Presidential flag to the Elysée, or official residence of the President.

What M. Doumergue will do with his new position is as yet uncertain, but he is the distinct choice of the majority of the deputies selected by the people and the reign of a constitutional head of the state is always followed with interest.

## First Ship on the Great Lakes

IT was on August 7, 1679 that the first ship to sail the waters of the Great Lakes above Niagara Falls breasted the waves of stormy Lake Erie. She was the Griffin, so named by her owner and builder, René Robert Cavalier, Sieur de la Salle, in honor of his friend and patron, the great Count Frontenac, Governor of Canada, whose family escutcheon bore the device of three talons of the fabulous bird-

It had cost a fortune to build and rig her in the wilderness throughout that long winter of 1678-1679. La Salle of the iron will had had enemies in wind and wave and weather to try his courage, but worse than these was the treachery in his own camp. His pilot, probably in the pay of the interests who were seeking to compass his ruin, had managed to wreck the vessel which had brought La Salle over Lake Ontario from his seigneurie at Fort Frontenac, where Kingston is to-day, after La Salle had gone ashore. All the equipment and supplies had gone down except some tackle and the anchors for the Griffin. Moreover, his men were continually incited to mutiny by paid agitators among them, and he could hardly trust his officers. Then, new equipment being necessary, news arriving that his creditors in Montreal were already pressing, and attacked with snow-blindness, back in February to Fort Frontenac on snowshoes along the southern shore of Lake Ontario he went with two of his men, leaving Tony, the only man he ever fully trusted in the wilderness, to command the shipwright operations.

On the east, the present United States side of the Niagara River, six miles above Niagara Falls, at the mouth of Gaynor Creek and behind the shelter of Cayuga Island, the camp was made, trees were felled, stocks set up, and the ribs begun. La Salle was there to drive the first bolt. Then Tony carried on.

In spite of interruption and peril from hostile Seneca Indians, who prowled incessantly about, the work progressed. Plots of the savages to burn the hull were foiled. In spite of near starvation through the loss of the supplies aboard the wrecked vessel, the men were held to their task.

Finally, the Griffin was finished. There was a ceremony, half military half religious, for her launching. She was a stately little craft of forty-five tons burden, and, if her timbers were not seasoned, they were at least sapless hardwood rendered snug with infinite pitch and by tight construction. From her portholes frowned five little naval guns, and her figure-head was the Griffin carved in wood. Tony took his men aboard and moved the little vessel away from the menacing Iroquois upstream to the vicinity of the present city of Buffalo, there to await La Salle.

Month after month till the first days of August she lay waiting for her indomitable commander. His enemies and creditors had won in Canada, had seized all his property including his seigneurie at Fort Frontenac. He was virtually ruined, but, nevertheless, he brought supplies and allowed no hostile action nor any misfortune to check his course.

Up the current they towed her till the waves beat in from the open lake. Then her commander on the poor, her crew greeting the future with the Te Deum for the past, as the French in Canada were wont to do, she moved out on the uncharted waters of treacherous Lake Erie, ran for four days before the breeze to the Detroit River.

ON Green Bay on Lake Michigan the Griffin was loaded with a great cargo of furs collected by La Salle's men sent on ahead. These pelts were the explorer's last hope. These would pay his creditors, restore his prosperity, provide an earnest of achievement to come. But he would not himself delay his progress of discovery to take them to Niagara. His pilot, whom he must have believed a traitor, would have to do that. Late in September the Griffin set her sails and fired her parting salute. La Salle pressed onward in canoes southward on Lake Michigan, seeking the Mississippi.

The Griffin left on the eve of a storm. She carried the first cargo on the Upper Lakes and she was destined to become the first mystery. For never again was heard any word of ship or crew. La Salle failed to the end that the treacherous pilot, perhaps assisted by the crew, had sunk her or at least run her on the rocks. But none can tell. Perhaps the secret still lies among the granite islands of Georgian Bay and may yet be brought to light. His brave short career carried an epitome of the future cruelty of those fair waters.

ROOMS AT SHOW**

Women's Institute Prepares  
For Participation in Fall  
Fair

Members of the Victoria Women's Institute are invited to attend the arrangement of the exhibit and the tea rooms at the Willows Park on Saturday week. The Institute again having charge of the tea rooms.

On the present occasion the annual business meeting will be held on Friday, when the hostesses will be Mesdames Kerr, Wilkinson, Johnson and N. P. Macdonald.

Meanwhile the members are trying to make both their exhibit and the tea rooms a success. Members having fancy work are invited to bring it to the rooms and Mrs. C. L. Campbell, the convenor, will look after it. Members with jam, pickles, jams etc. are invited to come to the tea rooms where Mrs. Urquhart will look after them.

Rev. E. D. Braden, of Kerrisdale Methodist Church, Vancouver, conducted the services in the South Saanich Union Church last Sunday.

## IN WOMAN'S DOMAIN

### CROWD WATCHING EVENTS AT GANGES PICNIC

The accompanying picture shows a section of the large crowd of the David Spencer Limited picnickers interested in the sports programme. The tug-of-war team is holding the centre of the stage.

### PRETTY WEDDING AT LADYSMITH

### SOCIAL AND PERSONAL

Miss Knox has returned home from a visit in Vancouver.

Mrs. J. C. Agnew of Vernon, is spending the week in Victoria.

Mr. J. W. Hough of Courtenay, is a guest at the Dominion Hotel.

Mr. and Mrs. C. D. Smith of Vancouver are spending a few days in Victoria.

Mr. and Mrs. R. C. Gillespie of Calgary, are registered at the Dominion Hotel.

Mrs. E. C. Wroot-Franklyn of Seattle, is a visitor in town a guest at the James Bay Hotel.

Mrs. H. Rowley ne (Eva Matthews) of Lampson Street, is leaving for Toronto, Ont., to-day.

Mrs. Melville Parry of Vancouver is a visitor in Victoria and is a guest at the Empress Hotel.

Mr. F. C. Hall of Vernon, and her three children, are visiting during the Summer in Victoria.

Mr. W. J. Mooney, after spending a week in Victoria, has left for his home in Edmonton.

Mr. Cantell of Vancouver, formerly of the cableship Restorer, is spending a few days in Victoria.

Miss Lennox and Miss Jean Lennox have returned from spending a month's holiday at Parksville.

Mrs. G. H. Rogers of Ottawa, and Miss Helen Rogers of Edmonton, are guests at the Empress Hotel.

Mrs. J. W. Dobbin of Qualicum Beach is a visitor in Victoria and is a guest at the Balmoral Hotel.

Mr. Herbert Leiser, who for two weeks has been a visitor in Stewart, returned home on Tuesday.

Mr. A. G. Vale of Brandon, Manitoba, is spending a week in Victoria and is a guest at the Balmoral Hotel.

Mr. Valentine Quinn, Comptroller of the Granby Consolidated Company, was in the city yesterday from Nanaimo.

Miss Doris Plimley, Fort Street, is the guest of her cousin, Miss Grace Plimley, at her Summer home at Cordova Bay.

Mr. and Mrs. McClellan of Vancouver are spending a few weeks in Victoria and are guests at the Empress Hotel.

Mrs. F. B. Gregory of Craigdarroch Road, is spending a week at Parksville as the guest of her sister, Mrs. F. E. Winslow.

Mrs. M. Holman left yesterday morning on a month's visit to her daughter, Mrs. F. W. Costin, "Mountview," Mount Arrowmith.

Among the arrivals at the Empress Hotel yesterday were Mr. and Mrs. A. E. Tregent and Miss Tregent, and Miss Baker of Vancouver.

Mr. and Mrs. C. E. Nelson are among the visitors in Victoria who are attending the Strathcona Hotel.

Mr. and Mrs. E. H. Lewis of Vancouver arrived in Victoria yesterday to spend a week's holiday at a hotel.

He has profited deservedly from the results of his skill. Nobody has failed to get his money's worth at Oscar's tables. The monotony considerations are a world of truth in this little editorial I have quoted.

Almost everybody eats too much. Perhaps one meal a day is not enough, but whether you eat once or three times, I beg of you to eat moderately. You cannot get along without a reasonable amount of rest and sleep, but you can get along on a much smaller intake of food than you indulge in every day.

There is another way of extending the span of life than by reducing the number and size of the "helpings" at each meal. Try it and see how much better you feel.

You need not tell me about Mr. A. and Mr. B., notoriously enormous eaters, who lived to be a hundred. There are some human beings who have some automobile engine, reluctantly refusing to stop in spite of outrageously bad treatment. If it were not for the exceptional cases, there would be no need of issuing warnings to big eaters. The continued existence of one violator of all the rules of hygiene appears to be more impressive than the untimely deaths of hundreds who died young just because they paid no attention to the rules of hygiene and common sense.

Oscar's has done more harm than good. He has been a socialistic bohemian interloper, and in making this statement I am fully alive to all the evils of rum-drinking. Some day it will be considered just as unwise to overeat as it is to get drunk.

Imitate the personal example of Oscar. Eat moderately and be rich in health if not in money.

Miss Winifred Higham, on the teaching staff of the Prince George schools, is spending the holidays at Port Washington, North Pender Island.

Miss Dunn of Victoria is spending a two-week vacation as the guest of Mr. and Mrs. F. W. Costin, "Mountview," Mount Arrowsmith.

Miss Dorothy Bremore and Miss Jessie Dunn of Victoria are spending a two-week vacation as the guests of Mr. and Mrs. E. W. Lewis of Vancouver. Miss McLeavey, Mr. F. W. Pincham, Eric Burton and many others.

### GARDEN PARTY WAS BRILLIANT AFFAIR

#### Lieut.-Governor and Mrs. Nichol Entertained Large Number of Guests

With ideal Summer weather to give the final touch of perfection to a delightful function, the annual garden party at Government House took place yesterday when His Honor the Lieutenant-Governor and Mrs. Nichol entertained several hundred guests. The gardens are unusually beautiful this year and made an idyllic setting for this most popular of the Summer social functions.

Lieutenant-Governor and Mrs. Nichol, who were accompanied by their daughter, Miss Marquita Nichol, received their guests on the lawn before the Summer house and as the guests paraded across the velvet greenward the tea was served. Some of the tea was also done in ice cream and candies at the respective stalls.

A list of prize-winners follows:

**Division E—Fruit**

Raspberries—1, J. Hutchinson; 2, Mr. Butler.

Logans—1, E. Bailey; 2, Mrs. Walden.

Blackberries—1, J. Hutchinson; 2, Mrs. Stevens.

Rhubarb, large—1, Mrs. Appleby;

Rhubarb, small—1, Mrs. T. Wallace; 2, Mrs. Rans.

Apples—1, J. Harper; 2, Mr. Butler.

Peaches—1, Fred Ricketts; 2, Mrs. A. Head.

Pears—1, Mr. Butler.

**Division F—Plants and Flowers**

Collection of house plants—

Bougainvillea—1, Mrs. Hutchinson; 2, Mrs. Elston.

Dianthus—1, Mrs. A. Head; 2, Mrs. Lockley.

Phlox—1, Mrs. Hutchinson; 2, Mrs. Sudder.

Flax—1, Mrs. L. Hall; 2, Mrs. Rhodes.

Scotch shortbread—1, Mrs. A. Wallace; 2, Mrs. Rans.

Shortbread—1, Mrs. W. Sudder; 2, Mrs. Elston.

Cookies—1, Mrs. Elton; 2, Mrs. L. Hall.

Bread—white—1, Mrs. A. Head; 2, Mrs. Lockley.

Bread—brown—1, Mrs. Elston; 2, Mrs. Lockley.

Bouquet of cut flowers—1, Mrs. Sudder.

Devil's claw—1, Mrs. A. Head; 2, Mrs. Lockley.

Devil's claw—1, Mrs. L. Hall and Mrs. Sudder.

Decorated cake—1, Mrs. Fred Lockley.

Decorated cake—1, Mrs. Fred Lockley.

Fancy work—1, Mrs. Beard; 2, Mrs. Elston.

Fruit pie—1, tie, Mrs. Kelly and Mrs. Fred Lockley.

Lemon pie—1, Mrs. Rhodes; 2, Mrs. Kelly.

Meat pie—1, Mrs. Kelly; 2, Mrs. Fred Lockley.

## TO SUBDU GERM DISEASES MAY BE TASK OF CHEMISTS

Progress in Fight is Described  
By Dr. H. H. Dale of  
London

Leader Addresses Physiolo-  
gists at British Association  
Meeting

Toronto, Aug. 7—Do Germans hold the secret key to East Africa? Is Drug 205 the combination which will open the door of the Congo to civilization? These were the questions asked to-day by H. H. Dale, C.B.E., M.D., F.R.S., head of the department of biochemistry and physiology of the Medical Research Council, London, in his presidential address to the physiology section of the British Association for the Advancement of Science here.

Germany has a key, Dr. Dale admitted, but so have the French. Drug 309, developed at the Pasteur Institute, is equally efficacious as a cure for the dread sleeping sickness which wreaks havoc in tropical countries and their arsenals of "Terror and Sainse" workers at the Rockefeller Institute have revealed another means by which Africa may be made habitable for white people.

Speaking of "205," developed after fifteen years of continuous work on the part of the scientific staff of the Bayer Dye and Chemical Corporation, Dr. Dale said: "There seems to be no reason to doubt that this substance has cured a number of cases of African sleeping sickness in man, even though the disease was well advanced and in which all previous known remedies had failed."

**PROGRESS FORESHADOWED**  
The development of this compound is an example of results which may shortly be expected in the way of treatment for infectious diseases of man, following upon Paul Ehrlich's revolutionary ideas on the subject of chemotherapy, in Prof. Dale's opinion. Chemotherapy, or the specific treatment of infections by chemical remedies, aims to poison the minute animal or bacterial forms which are parasitic on the human body, by the agency of compounds which are equally effective on the body of the afflicted person. That cures of this sort, safe and sure, should be synthesized in the laboratory for all dread infectious diseases, was Ehrlich's dream which has stimulated science to the discovery of "205."

**A FAIRY TALE**  
The invention of this drug and its two competitors is in itself a fairy tale of science. The German firm published the results which had attended its use of the new compound in 1920, but it neglected to give out its formula. The chief question which other investigators, anxious to learn the composition of the material, and to work to bring it off the market, dissolved in water easily and was colorless, and that it was a salt of a complicated sulphuric acid. Scrutiny of the German patents revealed that it must have an intricate chemical formula of a certain type, but there were an immense number of ways of grouping the components of the drug, any of which might be the successful Bayer product.

**FACTOR OF SAFETY**  
Fourneau and others attacked the problem at the Pasteur Institute, and having first ruled the dyes from the series, since they evidently did not fit into the compound, they proceeded to put all the possible combinations to the test, and the result was the preparation 309, which appeared to be as efficacious as the original. Commenting on the nearness of the match, Dr. Dale said: "If M. Fourneau has not identified Drug 205, he has discovered another compound having very similar, and probably as valuable properties." Both have a high factor of safety, as the dose which is lethal to the patient, is at least 100 times the quantity which is needed to fight back the disease.

**USED AS REQUIRED**  
"The remarkable property of '205' is the long persistence of its effects," Dr. Dale told the physiologists. "A dose injected into a mouse, a rabbit or a rat, will not only free the animal, if already infected, from trypanosomes—the causal organisms of sleeping sickness—in a few days, but will also render it resistant to such infection for weeks, or even months." This property, possessed in common with other salts, comes from the belief that the chemicals stored in the body tissues are used when it is first administered, and is put into action only as required, possibly in a modified form as a result of contact with the body tissues.

**REACTS WITH TISSUES**  
The realization that the drug must react in some way with the tissues

of the patient shows that the investigator, although fired by his idea, Dr. Dale pointed out. They started with the aim of securing compounds with a maximum affinity for the protoplasm, or body material of the parasites, and thus exerting a maximum poisonous action on them, but at the same time, without affinity for the organism of the host. The view which now prevails is that in many cases there is some reaction with the body fluids or tissues of the host, which is essential for the successful combating of the invading germs, but which is without harmful influence on the human body.

### MECHANISM OF CURES

That the exact mechanism of cures has not yet been worked out, although many of them are used widely and are well established by the state of knowledge as to the means by which quinine controls malaria. "Although it was one of the earliest of chemotherapeutic discoveries, the cure of malaria by quinine has never been satisfactorily explained," the speaker reminded his audience. Those who are probing the question are again driven to the view that though the quinine has no hurtful effect on the body, it does react with the tissues.

### TASK FOR CHEMISTS

While the medical treatment of disease is still not on a par with satisfactory results, the time for trial and research methods of developing medicines of this kind has passed.

Dr. Dale pointed out. Many of the results which the research workers have obtained are conflicting, but order is gradually being brought out of the chaos, and concrete achievements are already to the credit of those who are doing the work. Paul Ehrlich's first theory would still apply, and hold in modern form in the light of the latest studies of Avery and Heidelberger, of the Rockefeller Institute, who have been attempting to analyze the structure of a pneumococcus, a pathogenic type, with the object of determining the exact chemical machinery whereby combination with the remedial drug takes place.

They forecast, in this way, the day when all infectious diseases, bacterial and protozoan, will resolve themselves into a matter, and concrete achievements are already to the credit of those who are doing the work. Paul Ehrlich's first theory would still apply, and hold in modern form in the light of the latest studies of Avery and Heidelberger, of the Rockefeller Institute, who have been attempting to analyze the structure of a pneumococcus, a pathogenic type, with the object of determining the exact chemical machinery whereby combination with the remedial drug takes place.

## TONS OF HERRING PACKED ANNUALLY

Industry Aids Other Branches  
of Manufacture on Island

Prospects for the herring season, which starts in October, are being surveyed with more than ordinary interest this year as the value of this industry to the province was particularly noticeable last year, when over 233,000 tons of salt herring were shipped to the Orient.

Of this quantity about 45,000 tons were shipped from the west coast of Vancouver Island, 17,500 tons from the east coast of the Island and the balance from northern packing plants.

To make this export of more than 65,000 tons, it required 22,000 tons of salt, 9,200,000 feet of lumber for boxes, 175 tons of nails, and 4,000,000 feet of wire, besides the hardware used.

All this material goes with the fish and helps constitute the total tonnage moved from port.

An endeavor is being made to have the herring fishing season closed from February 1 each year, as it is claimed that the fish market after that date are not good for the markets in foreign lands.

### SEATTLE SHIPPING

Seattle, Aug. 7.—After a voyage from New York in the Seattle-built freighter Wainwright A. Lichtenbach, Richard D. Wrigley, Jr., university student; Robinson Schillaber, Princeton University student; Charles A. Reppello, treasurer of Robinson's Process Company, New York, and E. J. Finnegan, of Pitt & Scott, New York freight forwarders, have arrived here. They are the guests of M. J. Wright, district manager for the Lichtenbach Steamship Company.

When the steamship Victoria sailed yesterday for Nome, Alaska, she carried on board Mr. and Mrs. Harry Edmund Roose of Kirkland, Wash., who were married Wednesday night and will stop at Nome en route to one of the Diamond Islands, near Seltera, where they will teach.

Mrs. Reese was formerly Miss Maude Kelsey of Seattle. Both attended the University of Washington Summer School.

Bringing close to 1,000 tons of East Coast cargo, the Dollar Steamship Company's freighter Margaret Madison arrived here yesterday. After discharging, she will load Oriental consignments brought here by the steamship President Madison for New York and Atlantic ports.

## CHINESE BUYING PREPARED FOODS

Canadian Manufactured  
Cereals to be Shipped on  
Empress of Canada

When the Empress of Canada sails for the Orient next Thursday there will be a large shipment of Canadian-made breakfast foods aboard the ship manufactured from prairie grains.

That the purchasing power of the Chinese masses is higher than is generally supposed is effectively demonstrated by the quantities of fancy goods that move through this port.

One Canadian firm manufacturing a cereal product is meeting with considerable success in marketing the small packages in China by having all labels and cook books printed in the Chinese language and even the pictures of the Chinese cooks on the labels and advertising matter are photographs of Chinese men and maid-servants.

In the past three years there has been a marked effort made to educate the Chinese to the use of Canadian products with the result that the manifests of ships leaving here for the Orient show a big increase in the number of commodities moving and the expansion is always with firms making a special effort to please the taste of the Chinese buyers.

### SAN FRANCISCO SHIPPING

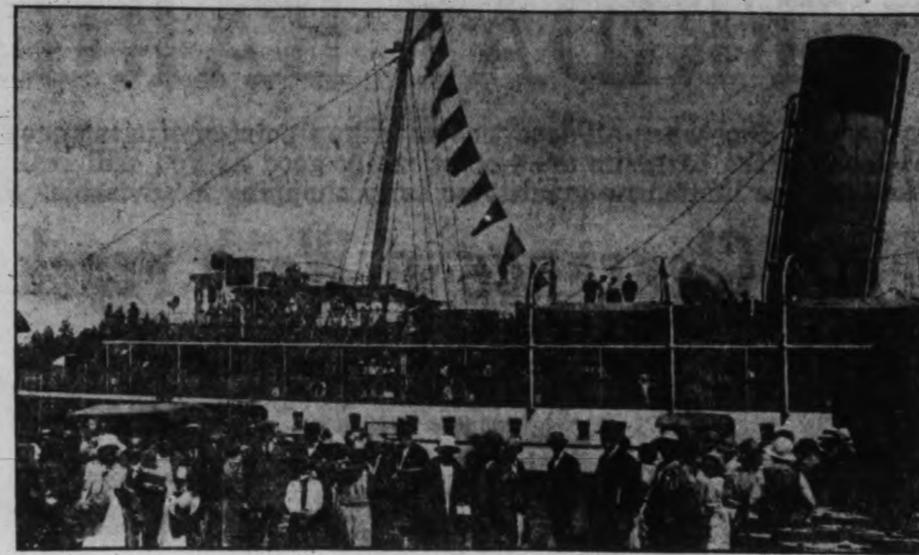

San Francisco, Aug. 7.—The Siberia Maru of the Toyo Kaisei Kaisha Steamship Company is due here today from Japan with a cargo which includes 1,450 bushels of raw silk valued at approximately \$1,500,000. The ship's destination is consigned to New York. In addition the vessel carries fifteen boxes of gold coin consigned to a local bank.

The Pacific Mail steamship President Cleveland, is scheduled to arrive here to-day from the Orient with a large passenger list and cargo. The Cleveland is carrying a heavy silk shipment from Japan consigned to Vancouver Island, where she will land supplies of oil, lumber and food-stuffs. She was loaded practically to capacity, and lumber was piled high on her forward deck. About 360 barrels of oil constituted her cargo of fuel for the stations.

The Estevan is under the command of Capt. H. R. Bilton and the voyage will take her around the Islands. She will call at every lighthouse and wireless station from here to Triangle Island, and will then proceed to the East Coast.

The steamer Newington, working out of Prince Rupert also tending lighthouses, comes only as far south as Eureka.

The vessel is shown landing her passengers at the wharf.

## JAPAN OVERSTOCKED SINCE EARTHQUAKE

Heavy Shipments and Speculations Cause of Business Failures

Recent advices received by the Victoria Chamber of Commerce of a revival of lumber orders from Japan in the form of Japanese squares, 1,500,000 feet of which were shipped within a few weeks, are supplemented by a further report on business in Japan and information on the attempted boycott of American goods. The attempted boycott, a heavy unfavorable balance of trade, a surplus of imported stocks on hand and a depreciated yen are factors of importance contributing to the general depression that prevails.

After the earthquake last September huge orders were placed for a manner of products, but particularly supplies for rebuilding the devastated areas. There were, of course, those firms who saw an opportunity for advantageous speculation with the result that in the case of lumber, iron and steel products, building and roofing papers, nails and even food products of various kinds there was a surplus imported over actual requirements which has caused considerable consternation and embarrassment to the trade in general, particularly as the goods were admitted duty free.

**DUTIES RESTORED**

After April 1, when all duties were restored, importers were practically standstill, unable to put through foreign imports while there was so much stock on hand. This condition has been maintained practically until the present time in some lines. To add to the confusion many of the smaller importers could not afford to hold so much stock and being pressed by the banks have been cutting prices to get rid of some which has affected the market adversely, although it has helped to make room for fresh imports.

Continued heavy arrivals of lumber after the earthquake caused prices to rise, particularly by March. Canadian lumber could be purchased in Japan for about the same price it could be bought in Canada. British Columbia mills accepted business at prices much below those paid for the large orders just after the earthquake. For a time dealers in Japan could buy new lumber from Canada cheaper than the lumber already in the market. Many importers and dealers holding high-price stock went under. Similar experiences are reported in other lines besides lumber. There are one or two thousand pieces of cordage still in use in Japan which cannot be disposed of, the latest Government restrictions preventing the use of anything but fireproof flets.

**EARTHQUAKE RELIEF**

Much of the foodstuffs sent to Japan to relieve the masses after the earthquake has found its way to small grocers and it is possible to buy Australian jams, New Zealand corned beef, Canadian salmon and tinned milk and American canned vegetables cheaper than the wholesaler must pay for new stock.

## RAILWAY CHIEF SAYS NEW BOATS NEEDED FOR RUN

Sir Henry Thornton Will Recommand Construction of Two Craft For B.C. Coast

Principe Rupert, Aug. 7.—Sir Henry Thornton, president of the Canadian National Railways, addressing a Board of Trade banquet last night, said he had concluded that in order to take care of American tourist possibilities on the Pacific Coast, the National system needed two new steamers. Sir Henry said he would, on returning East, take this up with the Minister of Railways, recommending that the steamers be built in Prince Rupert. On this question the Government had no objection.

He looked forward, said Sir Henry, to making an immediate start on the first steamer for Alaskan traffic, as well as for Government sanction to start on the second next year. It was the intention of the company to attack aggressively for a greater share of the American tourist trade, which would also involve the building of a hotel here. He said he would do all in his power to get an appropriation in next year's budget. Sir Henry and the accompanying party leave for the East on Thursday morning.

**NEWS IN BRIEF**

Inquiries for rented property are being made at the city land office.

A meeting of the public works committee will be held to-morrow afternoon.

Provincial Normal School at Victoria will open on Tuesday, Sept. 2, it was announced to-day by Miss Lucas, secretary.

Applications from pupils entering on courses should be sent in to D. L. MacLaurin, principal, before Aug. 20, it was also announced.

It is understood the revised lands committee is ready to make a recommendation to the council on the lands department, for which there were eighty-five applicants.

At the close of the hearing in City Juvenile court yesterday Herbert Killam was committed for trial by higher court on a charge of gross indecency. Henry C. Hall, K.C., appeared for the accused and C. L. Harrison for the crown. The accused was found in the sum of \$4,000.

The Good Roads League of B.C. has asked the council to renew its subscription to the membership, which is representative of public bodies, automobile associations, and good citizens who are interested in the project. The meeting will be held at Penticton Sept. 2, the day before the Union of B.C. Municipalities opens its annual meeting.

An application made by E. H. M. Foy in City Police Court this morning, Archibald E. Hood was remanded further. Previously the accused pleaded guilty to a charge of theft from the Vancouver Milling and Grain Company, Ltd., and was remanded for sentence. Magistrate May agreed to an adjournment until Tuesday next.

Rotarians attending to-day's luncheon at the Chamber of Commerce heard with interest the first of four programmes to be presented by E. Hayward's business methods committee.

Rotarian Hayward characterized the effort of International Rotary to codify business ethics for various commercial activities, as the first attempt of the kind. "The club as a club can do little to give moral support to a necessary and growing movement, the question is one for the individual members," he said.

T. R. Myers outlined the history of ethical codes and their growth from savage taboos, through Roman citizenship requirements, the overcoming of the middle ages up to the present time. "What is right?" is an international commercial treatise of to-day, founded on confidence in a wrist of habeas corpus.

"Every man in the past has taken care that his neighbor shall not cheat him, but the day comes when every man who takes care that he does not cheat his neighbor," he summarized.

**VARIOUS VIEWPOINTS**

J. C. M. Keith spoke of the architect code. H. J. Pendray told of the pledge behind the reputable paint manufacturer's product. Harry Hoornemann, architect, had a hearty necessity for strict reliability incidentally praising Hon. John Hart for his strict impartiality in awarding Provincial issues and condemning as unfounded rumors of favoritism. P. B. Schmeekel outlined the code observed by the paint manufacturers. Mrs. Melville S. Perry, of Vancouver, sang delightfully during the luncheon, being accompanied by Horace Plimley. Miss Hayward also contributed a piano solo.

Many visiting Rotarians were welcomed by the members.

**VICTORIA TO SEE  
BREEDING RESULTS  
ON FARM STOCK**

Public courses demonstrating the value of pure breeds will be given at the Empire Auditorium, Victoria, on Aug. 18. It was announced by S. C. McLennan, of Ottawa, chief of the exhibits branch of the Department of Agriculture, on his arrival here to-day to complete arrangements for the demonstrations.

Live animals, bred from various types, are being brought here from the prairies for the demonstrations. This will be the first time live animals have ever been used in such an exhibition educational exhibit.

In the Government's horse exhibit a team of draft horses, a saddle horse and heavy delivery horse, which are the classes most in demand in the market to-day, will be brought here.

In the hog section, the exhibit will aim to show the various types of bacon hogs required for the market. These will be live hams and the dressed side of bacon, showing just what the dressed side of the carcass looks like.

In the sheep class, the progeny resulting from a poor ewe crossed with a poor ram which is a scrub lamb, will be shown. With it will be the result from the crossing of a poor ewe with a good ram.

Arrangements are being made with various breeders to have the winners of the championships and the reserve championships put in the Government exhibits where they will be publicly displayed on them and explain their good and other points.

There will be an exhibit showing the various grades of eggs under the new regulations put into effect last June, with experts there giving a candleine demonstration and talks on eggs.

A small exhibit of silver black foxes is being brought here. These animals are now registered in the Canadian live stock records, and the Government is encouraging this idea.

These live stock exhibits have been arranged to be shown at the fair now being brought to the Coast for the first time. Under the instruction of H. S. Arkell, Dominion Live Stock Commissioner, they will also be shown at Vancouver and New Westminster.

**OBITUARY**

Victoria bank clearings for the week ending to-day are more than double those for the corresponding week of last year.

This is the third consecutive week in which the clearings have been running more than double the comparative weeks of last year.

The total clearings for this last week amounted to noon to-day by the Victoria Clearing House \$4,209,851. For the corresponding week of last year the total was \$2,027,035.

Heavy traffic and recent Government financing are given as the reasons for the big increase.

The remains of the late Mrs. Nina Byrd are resting at the Thomson Funeral Home, 1626 Quadra Street, from where the funeral will take place at 2.30 o'clock, when the Rev. E. M. Cook of Chalmers will conduct the service, after which the remains will be laid to rest at Ross Bay Cemetery.

The remains of the late Louie Jew were forwarded by the Royal Jubilee Hospital, Mabel Ann Whitehead, aged forty-two years, wife of H. T. Whitehead of Westholme, B.C. The deceased was a native of York, Ont., and had resided in Victoria and vicinity for the past fourteen years, and is survived by Mr. Whitehead and two sons, Herbert and George, and two daughters, Rose and Ethel. The funeral will take place on Saturday afternoon from McCall Bros' Funeral Home, corner of Johnson and Vancouver Streets. Service will be held at 2.30 o'clock, after which the remains will be laid to rest at Ross Bay Cemetery.

**Want No Changes  
In Amateur Rules  
Meeting Decides**

Local Branch of B.C.A.A.U.  
Agrees to Reduction in  
Sentences

Amateur Boxers Are Warned;  
Arthur Manson is Elected  
to Presidency

Delegates to the local branch of the British Columbia Amateur Athletic Union, which was in annual session last night, refused to endorse proposals advanced by the New Westminster branch for a change in the rules dealing with the mixing of amateurs and professionals.

The delegates felt that the present rules should stand, although they were asked to support the recommendation of W. E. Finlay, president of the Canadian union, which will be presented at the annual gathering of the national body. This recommendation intends to do away with the life sentences imposed on an athlete who takes money and becomes a professional. A sliding scale is proposed. The local union advocates a minimum sentence of at least two years.

**BOXERS ARE WARNED**

The delegates were informed that at a recent boxing tournament held here amateur boxers were listed on the same card as professionals. A resolution was passed warning amateur boxers that a repetition will result in their suspension. The union did not wish to bring the boxers on the carpet for their first offence, but will do so if they appear at future events where pros are performing.

Arthur Manson, who has been connected with the amateur union for many years, was elected president of the local union for the first time. He was elected to succeed Percy Watson at last night's meeting. W. G. Burd was elected vice-president, and Walter McGuire remains the secretary-treasurer. The registration committee will consist of Messrs. Redman, O'Sullivan, Burd and McGuire.

**DELEGATES CHOSEN**

The annual meeting of the provincial union will be held on August 16 in Vancouver. The Victoria delegates will be Percy Watson, retiring president; Arthur Manson, newly-elected president; W. G. Burd, vice-president, and Dan O'Sullivan, who is a governor.

**Hillcrests Are  
Victors in Final  
of Indoor Series**

Coming from behind in the seventh and eighth innings the Hillcrests indoor team defeated the Y.M.C.A. at the Royal Athletic Park last night 14-7, in the final game for the championship of the second half of the Victoria and District Indoor League. As a result, Hillcrest will meet the Garrison for the Clearview Cup, emblematic of the indoor ball championship of the city. The Garrison had no trouble in winning the first half of the league, but they lost out in the second half. In the play-off series between the Garrison and Y.M.C.A. the latter team won the first game but lost the next two.

Last night the "Y" boys led for six innings, but in the seventh frame the Hillmen drove six runs across the plate, and in the next stanza they solved the same number of runs and took the game in six of tough luck in their half of the eighth. After scoring six runs and with the tying run on third base the umpires called the game on account of darkness.

Whether or not last Monday's play-off game will be played over again is not known, as the Y.M.C.A. have protested the game on the grounds that the umpire changed his decision. The teams were as follows: Y.M.C.A.—Moore, Brindley, V. Jones, Sellers, A. Jones, McKinnon, Clark, White, Lewis and Roseau. Hillcrest—D. Poyntz, Passmore, Butler, Fulmer, Mulcahy, Wachter, Fea, Ranni and McLennan.

**Paris Olympiad  
Witnessed End Of  
Athletic Careers**

**Many Members of American  
Team Likely to Quit; Paddock  
Going Into Golf**

New York, Aug. 7.—The Paris Olympics marked the end of competitive careers of a number of American athletes, notably Charles Paddock, Jackson Scholz, Clarence DeMar, Alfred LeConey, John Ray, Ralph Spence, and others.

One once famed as the "fastest human" may grace an occasional exhibition in the future, but everyone is certain the colorful Californian has taken his last gay fling at big-time competition. That he has been what you might exactly call a "pendulum man" for the Coast crack, Paddock is a golfer and plans to go after tournament honors on a serious scale.

Scholz, veteran of ten years' running, came out of retirement last week with a new lease on life in mind for the Olympic team. It was probably a good thing for Uncle Sam that the Missourian had this thought. Otherwise the showing of the Star-Spangled entry in the flat races (Concluded on page 13)

**Marjorie Leeming  
Wins Her Game But  
Her Sister Loses**

Tacoma, Aug. 7.—All visiting players came through without upset in yesterday's play in the Pacific Northwest tournament here.

In the women's singles Miss Irene Stephens, Seattle, defeated Miss Hope Leeming, Victoria, 7-5, 6-2. Miss Harry McMillan and Miss Stephens later 6-0, 4-6, 6-3. Miss Marjorie Leeming defeated the local star, Miss Alberta Edie, 6-1, 9-7.

**Canadian Davis  
Cup Team Plays  
Japanese To-day**

**Brown Men Are Favorite to  
Win Round; Australians  
Meeting Mexicans**

Montreal, Aug. 7.—The Davis Cup between Canada and Japan this afternoon starts at 3 o'clock, with the first singles match between Jack Wright, of Canada, and Saito Okamoto, Japan. The second singles match will follow between William Crocker and Zenzo Shimizu, the captain of the Japanese team.

The Japanese are still favorites for the event, but the splendid showing of both Wright and Crocker at the Seabright tournament last week has increased Canada's chances.

Okamoto plays a game similar to that of his countrymen, but with great deal of speed. Against the steadiness of the two chosen Japanese, Harada, the champion of Japan, looks in practice the best of the team. He hits hard and plays a beautiful all-round game. He will play in the doubles with Okamoto on Friday.

Baltimore, Md., Aug. 7.—The Australian Davis Cup team will enter its second round of American zone play this afternoon, meeting the Mexican team on the courts of the Baltimore Country Club.

Two singles matches, the first starting at 3 o'clock are on to-day's card.

Gerald Patterson will meet Ignacio Bobilla in the first game, and Pat O'Hearn, Wood and Francisco Gerdes will furnish the second contest.

**Norton and Kinsey  
Play Fine Tennis  
And Win Matches**

**San Francisco Star Springs  
Surprise by Defeating  
Carl Fischer**

Southampton, N.Y., Aug. 7.—Brian L. C. Norton of St. Louis, and Robert Kinsey of California, reached the semi-final round of the Southampton tennis tournament at the Madison Club yesterday. Norton defeated Howard Vosshell of New York, 6-2, 6-3, in the fourth round, while Kinsey furnished an upset, defeating Carl Fischer of Philadelphia, who is ranked three positions above him in the national rating. The score was 3-6, 6-1, 6-3.

Norton set too fast a pace for Vosshell. The Long Island man never got a taste of himself, but kept early in the second set, when he gained a lead of 3-1. At all other stages he was outclassed, remaining at the base line, while Norton homed his court with streaking drives.

Fischer started well against Kinsey, but his failure to go to the net cost him the second and third sets. Kinseys flattening chop strokes and greater steaming won him games in the second set. In the third set Fischer made numerous double faults which spoiled his opportunities after he had broken through Kinseys service.

**The Summaries:** Singles, first round—Robert Kinsey, San Francisco, defeated Carl Fischer, Philadelphia, 3-6, 6-1, 6-3; L. I. C. Norton, St. Louis, defeated S. Howard Vosshell, New York, 6-2, 6-3.

Doubles, first round—Fred C. Anderson and L. W. Fohrbman, defeated Stanley Mortimer and Goodhue Livingston, Jr., 6-2, 6-2; B. I. C. Norton and H. M. G. Kelleher defeated George Crawford and Perry Pease, 6-2; L. B. Bailey, Jr., and Allan Herrington defeated C. M. Barnes, Jr. and A. D. Alexander, Jr., 6-1, 6-2; Harvey Snodgrass and Walter Westbrook won from S. M. Burke and W. P. Pierson in default; Fred C. Anderson and S. Mangen defeated Phillip and Ludlow Vandewater, 6-2, 7-5; S. Howard Vosshell and Fred C. Baggs defeated A. M. Hyde and Walter Stokes, 6-4, 6-0.

**Tis Seth Rounds  
Off Willows Meet  
With Big Victory**

Only Real Longshot of Final  
day Pays \$22.75 to Win  
Seventh Race

**Short Prices Paid With  
Favorites Doing Well; Sunny  
Ways Wins Again**

Tis Seth, the three-year-old gelding from the Armstrong stable, polished off the meet at the Willows track yesterday afternoon by winning the final event from a classy field and paying \$22.75 on the nose.

It was a hard race for the bettors to settle on as there were four horses, Mary Jane Baker, Emma Williams, Bernice E. and Eugenia K., all splendid performers over the mile and seventy yards, looking about equal on paper. Added to this quartette was the unknown quantity carrying the name of Mrs. Underwood, and Tis Seth and Miss Kit.

Mary Jane Baker went to the post a slight favorite over Bernice E. The field proved fussy and Joe Underwood, always a bad performer, delayed the start through breaking too soon and completing a third of the oval before he was pulled down.

Mess Kit led for a short distance, but Tis Seth came up fast on the back stretch the first time around, and took the lead on the turn, holding out until she reached the wire.

Mary Jane Baker closed with a tremendous burst of speed, Paden riding the mare for all she was worth, but lost the decision by a short head. Bernice E. was third.

**GOOD PRICES**

Tis Seth was the only real long shot to come through with a win. Sir Frederick, who surprised the fans by running third earlier in the week and paying \$18.55, appeared right yesterday and romped off with the fifth race. He went to the post a third favorite and just managed, by his white nose, to keep Skookum, a real outsider, from winning. Sir Frederick paid \$12.40 on straight tickets, while Skookum was worth \$12.90 to place. Sheik II, the favorite, was third.

Baltimore, Md., Aug. 7.—The Australian Davis Cup team will enter its second round of American zone play this afternoon, meeting the Mexican team on the courts of the Baltimore Country Club.

Two singles matches, the first starting at 3 o'clock are on to-day's card.

Gerald Patterson will meet Ignacio Bobilla in the first game, and Pat O'Hearn, Wood and Francisco Gerdes will furnish the second contest.

**Norton and Kinsey  
Play Fine Tennis  
And Win Matches**

**San Francisco Star Springs  
Surprise by Defeating  
Carl Fischer**

Southampton, N.Y., Aug. 7.—Brian L. C. Norton of St. Louis, and Robert Kinsey of California, reached the semi-final round of the Southampton tennis tournament at the Madison Club yesterday. Norton defeated Howard Vosshell of New York, 6-2, 6-3, in the fourth round, while Kinsey furnished an upset, defeating Carl Fischer of Philadelphia, who is ranked three positions above him in the national rating. The score was 3-6, 6-1, 6-3.

Norton set too fast a pace for Vosshell. The Long Island man never got a taste of himself, but kept early in the second set, when he gained a lead of 3-1. At all other stages he was outclassed, remaining at the base line, while Norton homed his court with streaking drives.

Fischer started well against Kinsey, but his failure to go to the net cost him the second and third sets.

Kinsey's flattening chop strokes and greater steaming won him games in the second set. In the third set Fischer made numerous double faults which spoiled his opportunities after he had broken through Kinsey's service.

It is really remarkable that Tis Seth, after being out a year, has done as well as he has. He has had many obstacles to overcome.

In addition to his eye affliction, he has carried the managerial burden as well as the worries of a business reverse.

To-day the Browns are only three and one-half games behind the New York Yankees who are leading the American League. They have come up very fast lately. Many fans all over the country would like to see Tis Seth bring the Browns to the championship.

**Large Entry List  
For First Western  
Golf Tournament**

**Pros and Amateurs to Play at  
Saskatoon Next Week;  
300 Entries**

Saskatoon, Sask., Aug. 7.—Close to 300 golfers will compete in the first annual tournament of the Western Golf Association which is to be held at their pool at the Gorge next Saturday a great success. It is expected that a large entry list will be received from the local clubs while a number of swimmers will be over from Vancouver to compete.

Three British Columbia championships will be at stake, the 440 yards open, junior relay and men's water polo. At present the water polo championship is held by the Vancouver Amateur Swimming Club, and they are sending over a strong team to defend the title. The following members will make up the Vancouver team: Goal, Johnny Cameron; back, McDermott; half-backs, Bert Kirkup and Bob McMillan; forward, Chuck Hills, John Bayles and Francis T. Hunter, the Olympia champions.

The Mexican Davis cup combination of F. Gordes and Ignacio de la Borbolla, also has entered.

Among the American entries received are those of H. N. Williamson and Wimbleton this year; R. Lindley Murray and N. W. Niles; William M. Johnston and C. J. Griffin; the Kinney brothers; Vincent Richards and Francis T. Hunter, the Olympia champions.

The Mexican Davis cup combination of F. Gordes and Ignacio de la Borbolla, also has entered.

The amateur championships start the following day and will be completed with 36 holes semi-final and final rounds Friday and Saturday respectively.

Two amateurs, close to scratch players—Alfred Bull and E. M. C. McLarty—are entered from British Columbia. They are members of the Shaughnessy Heights Golf Club of Vancouver.

Phil Taylor, pro at the Victoria Golf Club, informed The Times this morning that he would not make the trip to Saskatoon.

**Vernon Baseballers  
Think They Will Win**

Vernon, B.C., Aug. 7.—Arrangements have been completed for the Vernon Baseball team to go to Vancouver to compete in the British Columbia's championship.

The local team qualified by winning the interior championship. A strong team will go to the coast and the opinion is expressed here that Vernon's chances for carrying off the honors are very good.

**Sisler May Be Thirty Per Cent. Less  
Effective, But He Has His Team Going**

1922 —  
100%

1924 —  
70%

This picture gives some idea of how the baseball pitchers rate the famous George Sisler, manager and first baseman of the St. Louis Browns. In 1922 he was the greatest ball player in the American League, but the following year he was forced out of the game by eye trouble and staged a comeback this year. The pitchers say that Sisler to-day is equal to 70 per cent of the Sisler of 1922.

A glance over the American League batting averages since the opening of the season bears out the opinion of the pitchers.

Sisler, instead of being up among the leaders, with a mark close to .400, has been far down the line, most of the time hovering around the .390 mark.

Sisler is just about 70 per cent efficient," remarked a veteran pitcher recently in discussing the status of the famous player.

"While still a good hitter, he is far from the dangerous batsman he once was. There is a lack of snap to his swing. His hits are more often Texas leaguers than line drives.

"In pitching to Sisler I have noticed that he does not follow the ball as closely as when he was leading the league in hitting. As a result, he hits late, many of his drives going to left field, seemingly lacking in power.

"Sisler is still a great player and a good hitter, but far below his brilliant form of other years."

It is really remarkable that Sisler, after being out a year, has done as well as he has. He has had many obstacles to overcome.

In addition to his eye affliction, he has carried the managerial burden as well as the worries of a business reverse.

To-day the Browns are only three and one-half games behind the New York Yankees who are leading the American League. They have come up very fast lately. Many fans all over the country would like to see Sisler bring the Browns to the championship.

**V.A.S.C. To Stage  
Annual Gala At  
Gorge Saturday**

**Three B.C. Championships at  
Stake; Vancouver Swimmers Coming**

Final preparations are being made by the Victoria Amateur Swimming Club to make their annual water gala to be held at their pool at the Gorge next Saturday a great success. It is expected that a large entry list will be received from the local clubs while a number of swimmers will be over from Vancouver to compete.

Three British Columbia championships will be at stake, the 440 yards open, junior relay and men's water polo. At present the Lee cup emblem

## AT THE THEATRES

**Thrilling Fist**  
**Fight Is Feature**  
**Of Columbia Film**

Frank Mayo, lead, and Jim Mason, heavy, stage a terrific fight. George Arneson directs. William Fox produced. "The Plunderer," the story of which deals with clashing mine interests, stalwart men, and romance. Jim Mason is right hand man to Tom Santchi, the other heavy of the story. Frank Mayo, head of the mine which is being plundered by Santchi and Mason, is killed in a skirmish of being deliberately entombed in the mine by Mason. When he comes to the town's only dancehall and sees Mason playing faro, he goes after him. The onlookers make no effort to prevent the fight. Frank Mayo, with rage, kills them down and by force of mental and physical force, subdues their peaceful tendencies.

No longer protected, Mason, a coward at heart, fights as ferociously as such a type can. Mayo threatens to shoot the roulette table. The ball goes and even until the table unbalanced, upsets, scattering chips all over the place. The fight ends with Mayo disheveled but victorious, and Edgar Selwyn's stage play.

Mason lying prone and unconscious on the floor.

The fight is one of the thrills in a picture replete with fast moving action.

Both Frank Mayo and Jim Mason are well cast. Their strength and their knowledge and stalwart physiques contribute a great deal to making this scene intensely realistic. "The Plunderer" comes to the Columbia Theatre to-day.

**Dragoman Threatens To Supplant Sheik**  
**By Ramon Novarro**

The word Dragoman threatens to supplant that of Sheik in the popular vernacular since the release of "The Arab," Rex Ingram's newest production.

"The Arab" is a screen version of Edgar Selwyn's stage play.

Mason lying prone and unconscious on the floor.

The fight is one of the thrills in a picture replete with fast moving action.

**Orchestra To Play At Dominion Theatre To-night**

Marking the fifth concert of the series, the Dominion Symphony Orchestra will again be heard to-night playing a very tuneful and pleasing musical interpretation for the feature attraction. "The Arab," Rex Ingram's newest production starring Ramon Novarro and Alice Terry. The feature being Arabian in tone will give the orchestra an opportunity to render a very fine selection of numbers in keeping with the atmosphere of the picture. A few of the numbers picked at random include: "Three Arabian Dances," "Ring," "Song of India," Rimsky-Korsakoff, and "A Love of Damascus" by Pines. The overture of feature attraction will be followed by a novelty interpretation of "The Sheik," by the orchestra and combined concert organ. Handley Wells will preside at the console. Another item of interest to music lovers will be the atmospheric interlude to the feature production in which Handley Wells, the popular basso will sing "The Bedouin Love Song" and "Less Than the Dust." This in itself should prove to be an exceptional offering for the musical enjoyment of a very funny comedy titled, "Political Pull," featuring the famous Spat Family, and a very interesting news reel including the first and exclusive views of the reception of the British Special Service Squadron at San Francisco, round out a very entertaining show.

## SHOWING THIS WEEK AT PANTAGES THEATRE

\* The GOVERNOR'S LADY - WILLIAM FOX SPECIAL PRODUCTION \*

Five Escaped  
 Drowning When  
 Wave Hit Ledge

Director John Griffith Wray and four of his camera crew experienced a real thrill at the same time narrowly escaped drowning, during the filming of an exciting scene in "The Marriage Cheat," Thomas H. Ince's gripping dramatic feature, in which Leatrice Joy, Adolphe Menjou and Percy Marmont head an exceptional cast.

The scene was adapted by James Creelman from the Saturday Evening Post story of the same name by Terrell. It tells of a young man who gives up the girl he loves to marry another for whose social position he feels himself directly responsible.

The story is only too well known to the readers of The Post. It literally deals with plane possibilities.

And Paramount took advantage of each and every one of them in making the screen version of the tale.

The scenes are laid for the most part in the land of romance and adventure. Then, too, there are scenes on the Islands, scenes of the ultra-fascinating life of the natives in their beautiful homes and gorgeous gardens.

Alan Corson, who made "Enemies of Women," "Under the Red Robe," "Three Weeks" and other pictures also as successful, produced "Unguarded Women." It is his first Paramount picture, and it finds example of what is to be expected from the same source in the near future.

The scene of the accident was "Coffin ledge," near Laguna, Cal., where the sea extends far back beyond the rock shore line, forming a death trap for swimmers. Director Wray, his first camera man, Henry Sharp, and three others were working on this dangerous ledge, about five feet above the water line, when a huge wave swept in from the sea.

Backed by a steep cliff, they were unable to escape. The wave crashed onto the ledge with tremendous force and as it washed out again, it carried the five men along. Alarmed by other members of the company, who succeeded in clambering back to safety.

The camera, which went to the bottom between jagged rocks, was recovered by one of the Hawaiian boys working in the picture, who dove at great personal risk and attached a rope to it.

Both players and technicians found plenty of excitement during the filming of the "The Marriage Cheat," at the Capitol Theatre for its setting is on an island in the South Seas, calling for many thrilling water scenes. Last week, when Wray was one of the most forceful characterizations of his career as "Octavia Canfield," said it was the most strenuous role she has ever been called upon to play.

"It's too fanciful—a pipe-dream!" said the producers.

Then—just a few months ago—the medical world was electrified by the news that life had actually been restored by the use of adrenaline—not once, but a dozen times. News dispatches had borne out the prophecy in the attorney-playwright's story.

Charles Furthmann, former deputy district attorney of Chicago, wrote the story two years ago after hearing of some strange experiments physicians had performed in restoring life in bodies after the heart had ceased to beat.

"It's too fanciful—a pipe-dream!" said the producers.

He is at present supervisor of music in the Portland High School, and is chormaster and organist of the Centenary Wilbur Methodist Church, his choir ranking as one of the best in the big Oregon city. Besides these duties he has a large teaching connection, his subjects embracing vocal and piano forte tuition. During the past season one of his engagements was tenor soloist in the Philadelphia Choral Union of Philadelphia. Before leaving for next season's duties a recital is being arranged for next Sunday week at the Centennial Church, when Mr. Muir will be heard in some of his own compositions for voice during the evening's service.

McMillan Muir, one-time resident of the city, and well-known in local musical circles, is spending two weeks' holiday in the Capital City. Mr. Muir is now resident of Portland, Ore., and since leaving here has been very busy in the work of his choice. He is at present supervisor of music in the Portland High School, and is chormaster and organist of the Centenary Wilbur Methodist Church, his choir ranking as one of the best in the big Oregon city. **LOEB SUMMER HOME IN MICHIGAN.**—The home of Richard Loeb, young Chicago slayer, shown above, is located on a high bluff about five miles out of Charlevoix, Mich., is built of rough stone, and is a combination of Spanish palace, California bungalow and luxurious Summer cottage.

**PRINCE CONGRATULATES CANADIAN MARKSMAN.**—The Prince of Wales is shown extending congratulations to Private D. Burke of Ottawa, winner of the King's Prize at the 61st annual meeting of the National Rifle Association at Bisley, England.

**FIGHTING SENATOR ILL.**—Henry Cabot Lodge, United States Senator from Massachusetts, who is in a critical condition following an emergency operation performed in a hospital at Cambridge, Mass.

**MAKE-RICH FINDS IN ORIENT.**—An archaeological party headed by Carl W. Bishop of the Smithsonian Institute, has discovered many ancient Chinese carvings in Shensi, which will prove of vast value to the world of art and science. Many ancient tombs were found, notably that of Ho Chu Ping, an historic Chinese cavalry leader of olden days, who drove the savage Huns from Chinese territory.

## SCHOOL DAYS

Copyright, 1924, by  
McClure Newspaper Syndicate

By DWIG

**INVITED BY TORIES.**—Winston Churchill, stormy petrel of British politics to whom a formal invitation to join the Conservative Party has been extended by ex-Premier Stanley Baldwin.

**WARNING TO PARENTS.**—Judge Ben Lindsay, Denver's famous Juvenile court judge, says the Loeb-Leopold case is a children's story with a warning to parents bringing up families.

**WANTS ULTIMATUM ON BRITAIN.**—Christian Rakovsky, Soviet envoy to Anglo-Russian party, who has asked Moscow to serve an ultimatum upon Great Britain.

**BABE RUTH, THE EMBRYO DETECTIVE, IN DISGUISES HE MIGHT USE.**—Babe Ruth, studying to be a lawyer and a detective, is shown above in five different disguises he might affect during his sleuthing. From left to right he is seen as: 1. A British locomotive, with a special headlight over his battring eye. 2. As Secretary Hughes, of the United States, with a full set of whiskers of the popular whiskbroom soupstrainer that is typical of gate crasher, who hasn't missed a big sporting event in the last twenty-five years.

**PICKED BY LOEB AS VICTIM.**—On the afternoon when Loeb and Leopold kidnapped and slew Bobbie Franks, they had at first intended to make ten-year-old John Levinson (shown above) the subject for their experiment in obtaining a new thrill by means of taking human life. The lad is the son of a millionaire Chicago corporation counsel, whom Loeb and Leopold believed would readily pay the \$10,000 ransom which they planned to extort from him after they had murdered his son.

**ALL HAD TO BE VACCINATED!**—Nearly every one of the 2,000 inhabitants of the village of Deer Park had been exposed to smallpox, the health authorities figured. A grocer, it was found, had been conducting business as usual though helping nurse his wife, suffering with the disease. So every man, woman and child in the town were vaccinated. Here Dr. C. A. Neal, health commissioner, is seen at work.

**RICHARD LOEB ENJOYS NEW THRILL.**—"Dickie" Loeb, nineteen-year-old co-killer of Robert Franks, is seen above being examined in the presence of his attorneys. Left to right: Walter Bachrach, defence counsel; Richard Loeb, self-confessed kidnapper and slayer; Dr. Karl Murdoch Bowman, of Boston; and Dr. H. S. Hubert, Oak Park, Chicago, defence attorney.

**FOR DEFENCE.**—Dr. Bernard Glueck of New York is one of the chief attorneys for the defence in the trial of Nathan F. Leopold Jr. and Richard Loeb.

**MAY RUN.**—Charles Hanna, twice mayor of Belleville and well-known Liberal, will likely be a candidate in the West Hastings by-election.

**HAD GREAT CAREER.**—David Belasco, dean of American theatrical producers, who celebrated his sixty-fifth birthday laid up in bed with grippe and bronchitis.

**SCIENCE LEADER.**—O. J. Howarth, O.B.E., Secretary of the British Association for the Advancement of Science, who has arrived in Toronto for this week's convention.

## BEDTIME STORY

### Uncle Wiggily's Lemonade Straws

Copyright, 1924, by McClure News-paper Syndicate.

(By Howard R. Garis)

"Isn't it hot!" grunted Mrs. Twisty-tail, the lady pig, as she slumped down in a chair on the shady stoop of Uncle Wiggily's hollow stump bungalow one day.

"I'm rather warm," said Nurse Fuzzy Wuzzy. "Still I don't seem to mind it so much."

"No wonder—you aren't as fat as I am!" laughed Mrs. Twistytail, who was jolly enough to joke about how big she was. "Oh, but I am so hot!" she sighed.

"How would you like a cool glass of lemonade?" asked the muskrat lad housekeeper.

"It would be lovely!" grunted the lady pig. "Have you any?"

"No, but I can make some," said Nurse Jane. So she squeezed the juice out of some lemons, put the juice in a pitcher with some water, sugar and pieces of ice from the ewer of Mr. Whitewash, the polar bear gentleman.

"Oh that sounds good!" sighed Mrs. Twistytail, as Miss Fuzzy Wuzzy stirred the lemonade, the ice making a cool tinkling sound in the pitcher.

"I hope it will taste as good as it sounds," said Nurse Jane. And then all of a sudden, she thought of something and exclaimed: "We haven't any hollow straws to slip our lemonade through! Oh, I must have some straws! Uncle Wiggily will get them for us."

"Why must we have straws?" asked Mrs. Twistytail, looking thirstily at the lemonade.

"It is ever so much more cooling to sip your lemonade through a straw," said Nurse Jane. "It lasts longer that way, too. Oh, Wiggly, my dear!" she called to the rabbit gentleman, who was twinkling his pink nose out in the yard. "Will you please get some lemonade straws for us?"

"Right gladly will I do that!" cried the bunny in his jolly voice. Then, knowing Nurse Jane and the lady pig were in haste to drink the cool lemonade, Uncle Wiggily jumped into his automobile and started for a field where some wheat grew. Wheat was good though which to sip lemonade, he knew.

Mr. Longears gnawed off a bundle

## A GENUINE BARGAIN

# Love Stakes

By MILDRED BARBOUR

She glanced at him apprehensively. She didn't like his tone, his assurance. She foresaw trouble.

"I challenge anyone's right to prevent me from going where, or as, I please."

He smiled deliberately into her eyes.

"The trouble with you is that you're too young and too attractive to realize that you can't twist every man in the world around your slim little finger. We're not all chivalrous Barry's, you know. If you marry me now, when you marry me, he'll rectect himself, 'for there's no doubt about you doing it in the end' you'll find that you've found your master.

"No, I will not stand aside!" growled the Bear. "At least not until Uncle Wiggily and Buntysball."

He flung back his head and laughed.

"Natalie, it's a crime really to put two such perfect products of nature into the same household. It's rather cornering the market. Moreover, I'm not the only one who has always believed you to be as naive and delicate as a kitten."

Trent was none too pleased. It even seemed to Natalie as though his carelessness and indecision was stabbed with a momentary apprehension.

When he announced himself, murmuring something about "infernal nuisances" Amory turned to Natalie with a grim smile.

"Couldn't have been better, if I myself had arranged to have that long distance call put in. As a matter of fact, I rather believe I set the ball in motion some days ago when I happened to be in the neighborhood of Boston. 'Till wager you any amount you care to name that Boston's on the mend, and of that we're sure."

Natalie raised indifferently inquiring brows, but Amory didn't pursue the subject. Instead he said abruptly: "Jeanette called on you this afternoon."

She stared at him. "She told you?"

He shook his head.

"She gave you nothing. She has never told me anything—anymore truth than that. But I'm not as blind as I seem. I have means of finding out—a great deal. The only trouble in this instance that I found out too late."

He looked at her speculatively.

"Not sure, either, that it is too late. Will you tell me the truth? Do you still love that husband of yours?"

Natalie met his eyes, prepared to tell him the truth, but the look in his eyes, the look of that inevitable determination when she gave Barry up to Jeanette Amory.

But Amory's eyes, for all their cynicism, were strangely kind.

"Why do you delight in hurting me?" she asked again, as she had asked so many times before. "Why do you take this keen, vindictive interest in my affairs? I'm nothing to you, never harmed you. Is it fate to hurt me most because you yourself were hurt once, especially since you told me earlier this evening that you had learned the truth about Barry and know now that it wasn't he who was responsible at all?"

He didn't answer for a long minute, during which he sat staring at the glowing end of his cigar.

"I don't want to hurt you," he said, at last slowly. "What I have done is designed solely to save you from hurt. Oh, I'll admit that, at one time, when my whole life was wrecked and I believed your husband to be responsible, I had a strong desire to see you suffer a little of what I was suffering. Your coolness, your remoteness, your I-can't-be-touched-by-any-human-transgression attitude was maddening. It roused every revengeful impulse in me. For a time, I had the desire to harm you, to bring you into a compromising flirtation, first with myself, later with Trent. But you proved so sweet and young, so unconsciously alluring, that I hated myself for even entertaining such a thought. When I found that my instinct for revenge had set a ball rolling that I couldn't stop, I was more remorseful than I ever dreamt. I would have given my life to stop the game that I myself started, to wring Trent's neck and drag along to the world the reason for your preferring to an affair with him. Oh yes," he nodded at her involuntarily start, "I know quite well, my dear, why you have gone to such pains with all this. Didn't I tell you once that I am an infallible reader of human motives? You haven't fooled me for a minute with your little play and your pseudo love affair with Trent.

the effect of the sun's actinic rays—was in itself an obstacle to the successful colonization of tropical countries by a white population. He cited several examples of the control of disease by public health administrative measures, which made possible, for instance, the building of the Panama Canal. The fact that white colonies had existed for long periods in tropical countries, for example, for example, Guayaquil and Brazil, was, he said, another proof that a tropical climate need not be unsuitable for white races. The vital statistics of Queensland, most of which was tropical, compared favorably with those of other parts of Australia, and the failure of the adjacent northern territory to support a white population had, he said, an economic rather than a climatic explanation.

## WHITE AUSTRALIA

In conclusion Prof. Gregory said:

"The policy of co-residence with racial integrity has failed to secure harmonious progress in South Africa, North America and South America. The development of the best qualities of the white races requires their separate existence as a whole, with opportunities for individual association and co-operation. In view of the inter-racial difficulties that have developed wherever the races are intermingled, Australia will throw away a unique opportunity if it fails to make a patient effort to secure the whole continent as a home of the white race."

### EXPECT LOGGING TO RESUME AT LAKE

Better Conditions Are Reported; Rain Badly Wanted

(Special to The Times)

Cowichan Lake, Aug. 7.—Messrs. Delaney and Lodge have handed over their contract for cutting cedar logs to the Jameson Logging Company and the Charter Logging Company.

Mr. Lodge, president of the British Association, said that the timber in the lake was not the result of logging operations but an old tree which probably had been floating about for many years.

The wife of Mrs. Trott and Mr.

Rudd were recovered from the lake yesterday afternoon, following extensive dragging operations. The remains have been sent to Duncan where an inquest will be held.

## BY-ELECTION TO BE HELD SOON

### Vacancy in Duncan Council to be Filled August 14

Duncan, Aug. 6.—Miss May Tombs was the fortunate winner of the car raffle by the Elks on Kiddies Day.

Owing to the resignation of Alderman A. S. Hadden, a by-election must now be held in Duncan. Nomination day is set for Monday, August 11, and in the event of a poll becoming necessary this will be held on Thursday, August 14.

E. T. Cresswell, solicitor, has been appointed police magistrate, replacing J. F. Davie, M.P.P., who resigned on election to the Legislature.

A few preliminary matches were played off in the Duncan lawn tennis tournament on Tuesday, which results follow:

Mrs. Curtis Hayward defeated Mrs.

Gooding, 6-2, 6-2.

Mrs. Hickes defeated Miss Conidine, 7-5, 6-2.

F. L. Kingston defeated Heggie, 6-1, 6-4.

Lauder and Miss Waldon defeated Mrs. Share and Miss K. Robertson, 6-4, 6-8.

Miss Geoghegan and Kingston defeated Mrs. Waldy and H. T. Mann, 6-4, 6-2.

Mann and Lundie defeated Hood and Heggie, 6-2, 10-8.

### MOVE TO CLEAR LAKE OF SNAGS

Cowichan People Sign Petition Asking Removal of "Dead Heads"; Bodies Found

(Special to The Times)

Lake Cowichan, Aug. 7.—A petition asking for the removal of partially-submerged logs from the lake is being widely signed here, following the sinking of a launch after it had been hit by a snag.

After brief mention of the geographical principles of inter-racial relations, Dr. Gregory suggested that in countries where white and colored races lived side by side, four policies might be followed: first, co-residence by inter-marriage; second, co-residence with complete social disfranchisement; third, disfranchisement of the colored population; or fourth, the segregation of the different races in separate countries in communities.

With regard to the first of these, controversy had long raged, many authorities holding that the effect of inter-racial breeding was to lower the physical and mental level of the colored races.

After the sinking of the launch, the Jameson Logging Company, the Charter Logging Company and the United States, where inter-marriage between whites and negroes was almost illegal. In South America, on the other hand, no such prejudices existed, and only a small proportion of the population was now of pure European descent.

Montreal Bandits  
ESCAPED WITH \$20,000  
Montreal, Aug. 7.—Detectives are scouring this city for three masked men who held up a postal service wagon and looted registered mail bags here Tuesday night. Cash amounting to \$20,000, consigned to Ottawa banks, was included in the loot.

## URGE CHANGES TO BENEFIT THE EMPIRE

British Leaders Advocate the  
Training of Boys For Life  
in Dominions

Views Laid Before British As-  
sociation Delegates in City  
of Toronto

Toronto, Aug. 7.—A report which is the greatest interest to Canadians was presented to-day to the Educational Science section of the British Association for the Advancement of Science here by a committee consisting of Dr. H. B. Gray, chairman; C. E. Brown, secretary; Dr. Vargas Eyre, Sir Richard Gregory, O. H. Latter and Sir John Russell.

In dealing with efforts that can or should be made to prepare boys and girls in Great Britain for careers in the Dominions or colonies, the report said:

"In recent years the congested state of the various professions and industrial occupations in Great Britain has contributed a serious problem to the educational authorities. Boys on leaving our secondary schools are finding it more and more difficult to obtain suitable openings in offices or works, and though a number enter banks or insurance offices, they represent only a tithe of those entering for places. On the other hand, the Dominions possess vast resources awaiting a population to develop them. They need workers for the land, and offer great opportunities to lads of spirit and enterprise. In spite of tempting offers to the overseas Colonies in the form of free land and loans, few boys from our public schools or from other large secondary schools are found to be taking to colonial life. Various reasons may be advanced to account for this reluctance or absence of desire on the part of English boys to go overseas, but however they are the effect is the same, a distinct loss to the Empire generally and a source of weakness to the home country particularly."

"While a boy is at school the problem of his future career seldom

troubles him; he is content to wait on opportunity when school days are over. Few boys up to sixteen have any definite ideas on the subject. Unless their parents or friends have places already marked out for them, they tend to follow some prescribed course of study leading up to such examinations as offer certificates qualifying for entrance into the various professions or into commercial life. Thus the school curriculum very often determines a boy's career. In the case, however, of the many boys who show no power or liking for any special school subjects, their future occupation depends on such choices as the banks and other offices are full of such young men, yet many of these would from their character and physical qualities be far better suited for the more vigorous and freer life on the land overseas."

### COMMITTEE INVESTIGATED

"At the Headmasters' Conference in December last emphasis was laid on the need for a scheme of education on the lines of a national service commission, and Dr. H. B. Gray, chairman; C. E. Brown, secretary; Dr. Vargas Eyre, Sir Richard Gregory, O. H. Latter and Sir John Russell.
